QUESTION 2

You have implemented two SC Series systems at a customer site. The Dell Storage Manager (DSM) Suite has been installed on a Microsoft Windows server. Both Storage Centers have been installed and added to the DSM. However,

several days after the installation, the customer is only able to see one Storage Center in the DSM GUI.

Which recommended action will correct this issue?

A. Check the network connections to the missing Storage Center

B. Reinstall the DSM including the database

C. Connect the DSM to the Data Collector

D. Restart the missing Storage Center

Correct Answer: D

QUESTION 3

During the initial installation of a new SC9000 Storage Center, which Dell Storage Manager (DSM) Client option should be selected?

A. Configure this host to access a Storage Center

B. Configure VMware vSphere to access a Storage Center

C. Discover and Configure Uninitialized SCv2000 or SC7000 Series Storage Centers

D. Login to a Storage Center or Data Collector

Correct Answer: D

---

QUESTION 4

A customer has two production sites with one storage administrator at each site. The customer wants to replicate data between their SC9000 storage arrays. Each administrator uses a workstation with the Dell Storage Manager Client to manage their respective system. Now, the CEO wants data replicated between both sites.

What is the first step to configure replication between sites?

A. Configure an iSCSI network over WAN

B. Install Dell Storage Manager Data Collector

C. Create a QoS node in Dell Storage Manager Client

D. Initially sync data with USB hard drives

Correct Answer: B

QUESTION 5

You are implementing a front-end connection in Legacy Port Mode on an SC4020 in a SAN with two iSCSI switches. What is the minimum number of port(s), per switch, that can be used by each controller?

A. One port on each Ethernet switch

B. Two ports on each Ethernet switch

C. Four ports on each Ethernet switch

D. Eight ports on each Ethernet switch

Correct Answer: C
