QUESTION 1

SPECIAL INSTRUCTIONS REMINDER

The remaining questions are associated with two cases. Each case has an introductory, descriptive passage (case text) that describes background information and requirements for a specific cloud based design. And each case has a set of
six related, randomized questions. You will need to read the case text in order to answer the related questions correctly.

Given that there are two cases with six scored questions each, the total number of case-based scored questions is 12.

When you display each questions you can easily review the related case text in a pop-up window by clicking on the "Case" icon (shown below)

Case 4

Refer to the exhibit.

Your company is currently using a traditional SAN storage network. The server infrastructure is partially virtualized. There is a public cloud in place that is used to test development and application migration to cloud.

Business requirements: Consolidate the network, storage, and compute resources Simplify network management and storage provisioning Maintain application performance Need to share resources to reduce cost and improve efficiency Other considerations: Monitoring of protection SLAs All transactions must be logged for auditing review Users are validated using internal credentials Refer to Case 4.

You are designing a brownfield cloud. You review the requirements and must determine the best, low-cost solution.

Which components must you include to meet the business requirements?

A. AD, AppDev platform, and Service Catalog

B. CI infrastructure, CMP, and AppDev platform

C. HCI infrastructure, CMP, and AD

D. CMP, AppDev platform, and Service Catalog

Correct Answer: A

QUESTION 2

What are key focus areas of requirements gathering for a cloud design?

A. Automation and multi-tenancy

B. Data growth and consolidation

C. Multi-tenancy and data growth

D. Consolidation and automation

Correct Answer: C

QUESTION 3

You plan to gather application performance data from an existing UNIX environment. What should you use?

A. esxtop

B. NaviAnalyzer

C. iostat

D. perfmon

Correct Answer: D

QUESTION 4

Which services are typically offered by cloud service providers?

A. Bundled storage, applications, operating systems

B. Operating environment, virtualization, applications

C. Software, platform, infrastructure

D. Compute, storage, connectivity

Correct Answer: C

QUESTION 5

What is a key benefit to consumers of cloud services?

A. Start with minimal capital expenditure

B. Dedicated SAN access to applications

C. Requires extensive IT skills

D. No operational expenditure

Correct Answer: A
