QUESTION 1

You are expanding the capacity of a Hybrid VxRail by creating an additional disk group. The new disk group will be composed of five drives on all participating cluster nodes. When you attempt to add the new disks to the vSAN datastore you receive an error message about there being no cache tier available.

What is the likely cause?

- A. vSAN supports disk groups with four drives or fewer
- B. Cluster requires vSAN Advanced or Enterprise license upgrade
- C. You attempted to add the disks to the existing disk group
- D. All the drives are labeled as HDDs

Correct Answer: D

QUESTION 2

A workstation is being configured on the management VLAN (10.150.140.0/24) to connect to VxRail Manager for first time deployment.

Configuring which IP addresses on the workstation will result in a successful deployment without having to change them during initialization?

- A. 192.168.1.199 and 10.150.140.100
- B. 192.168.1.250 and 10.150.140.255
- C. 192.168.10.199 and 10.150.140.255
- D. 192.168.10.250 and 10.150.140.250

Correct Answer: A

QUESTION 3

Which step is required to enable VxRail Manager capabilities to register the system, obtain product license files, update system software, download VxRail documentation, and browse VxRail Community?

- A. Enable the cluster/VDS/management accounts when using an external vCenter
- B. Enable EMC Secure Remote Support (ESRS)
- C. Configure VMware Secure Support Account (vSSA) access
- D. Set the Username and Password for the Support Account

Correct Answer: A

QUESTION 4

What is the Dell EMC product that is purpose-built for departmental and edge applications, as well as small enterprise and mid-market data centers?

- A. Vscale Architecture
- B. VxRail
- C. VxRack
- D. Vblock/VxBlock

Correct Answer: B

VxRail Appliances are purposebuilt for departmental and edge applications as well as small enterprise and mid-market data centers. Like VxRack Systems they do not contain a storage array, but instead run a software-defined storage environment on the appliance. They are built using standard x86 hardware, and tend to focus on ease of use and use case specific features. VxRail Appliances scale from 4 to 64 nodes.

QUESTION 5

When adding a VxRail node the validation fails. What could be the cause of this problem?

- A. IPv6 multicasting is not enabled
- B. Only one network interface online
- C. Time on the node was not set correctly
- D. DNS record was not created

Correct Answer: B
