QUESTION 1

An IT architecture is characterized as monolithic and rigidly bound.

What difficulty with adopting DevOps practices can be expected?

- A. Clearly defining the boundaries of the IT systems
- B. Defining areas of responsibility for each DevOps team
- C. Maintaining the increasingly complex architecture

Correct Answer: B

QUESTION 2

A company is not yet using DevOps practices. The team notices a problematic accumulation of technical debt. One of the team members suggests implementing DevOps practices to solve this problem.

Which DevOps practices support reducing technical debt?

- A. Constant refactoring and eliminating previous bottlenecks
- B. Continuous delivery and promoting pair programming
- C. Continuous feedback and implementing a deployment pipeline

Correct Answer: A

QUESTION 3

Commercial off-the-shelf software (COTS) has both advantages and limitations for businesses.

What is true about COTS?

- A. COTS supports continuous development with its fast implementation
- B. COTS will save the business time and money, by reducing development time
- C. Depending on the type of COTS used, the possibility of customization is limited

Correct Answer: B

QUESTION 4

Even more than Agile or Scrum, DevOps encourages continuous delivery of new functionality and continuous feedback from the customer.

What does this achieve?

- A. It increases the team's responsibility
- B. It improves customer relations
- C. It yields a greater return on IT

Correct Answer: C

QUESTION 5

When will an organization find it difficult to adopt DevOps practices?

- A. When many bureaucratic processes are in place, because this causes inflexibility
- B. When microservices are used, because they expand the attack surface
- C. When operational complexity is high, because DevOps needs a simple architecture

Correct Answer: A
