QUESTION 1

A company is not yet using DevOps practices. The team notices a problematic accumulation of technical debt. One of the team members suggests implementing DevOps practices to solve this problem.

Which DevOps practices support reducing technical debt?

A. Constant refactoring and eliminating previous bottlenecks

B. Continuous delivery and promoting pair programming

C. Continuous feedback and implementing a deployment pipeline

Correct Answer: A

QUESTION 2

Your team uses continuous delivery.

What are two reasons to keep the batch size small? (Choose two.)

A. So that each team member can get their own batch

B. So that root causes of problems can be identified and resolved quickly

C. So that the product owner can report back to the customer

D. So that the product owner has a good idea of what is delivered when

E. So that there is room for Kaizen blitzes in between work

Correct Answer: BD

QUESTION 4

A team stores not only source code, but many other things related to the IT system, such as tests, scripts, artifacts, libraries and many other things.

Which DevOps principle has this team implemented?

A. Continuous delivery

B. Deployment pipeline

C. Version control

Correct Answer: C

QUESTION 5

DevOps practices incorporate the value stream concept from Lean Production.

What is a value stream?

A. The amount of products that are delivered within a timeframe

B. The sequence of releases that deliver a working product

C. The series of actions performed to fulfill any type of request

Correct Answer: C
