QUESTION 1

How can a developer retrieve all Opportunity record type labels to populate a list collection? Choose 2 answers

- A. Obtain describe object results for the Opportunity object.
- B. Write a for loop that extracts values from the Opportunity.RecordType.Name field.
- C. Use the global variable \$RecordType and extract a list from the map.
- D. Write a SOQL for loop that iterates on the RecordType object.

Correct Answer: AD

QUESTION 2

A developer encounters APEX heap limit errors in a trigger.

Which two methods should the developer use to avoid this error? (Choose two.)

- A. Use the transient keyword when declaring variables.
- B. Query and store fields from the related object in a collection when updating related objects.
- C. Remove or set collections to null after use.
- D. Use SOQL for loops instead of assigning large queries results to a single collection and looping through the collection.

Correct Answer: AD

QUESTION 3

A developer created a lightning component name accountList.cmp that display a list of Accounts. Client-side logic that is executed when a user hovers over an account in the list should be stored in which bundle member?

- A. AccountListHelper.js
- B. AccountListRenderer.js
- C. AccountList.renderer
- D. AccountList.helper

Correct Answer: C

QUESTION 4

On which object can an administrator create a roll-up summary field?

- A. Any object that is on the master side of a master-detail relationship.
- B. Any object that is on the parent side of a lookup relationship.
- C. Any object that is on the detail side of a master-detail relationship.
- D. Any object that is on the child side of a lookup relationship.

Correct Answer: A

QUESTION 5

A developer wants to use all of the functionality provided by the standard controller for an object, but needs to override the Save standard action in a controller extension. Which two are required in the controller extension class?

- A. Create a method named Save with a return data type of PageReference.
- B. Create a method that references this.superSave()
- C. Define the class with a constructor that takes an instance of StandardController as a parameter.
- D. Define the class with a constructor that creates a new instance of the StandardController class.

Correct Answer: AC
