QUESTION 1

You need to use Power BI to ingest data from an API. The API requires that an API key be passed in the headers of the request. Which type of authentication should you use?

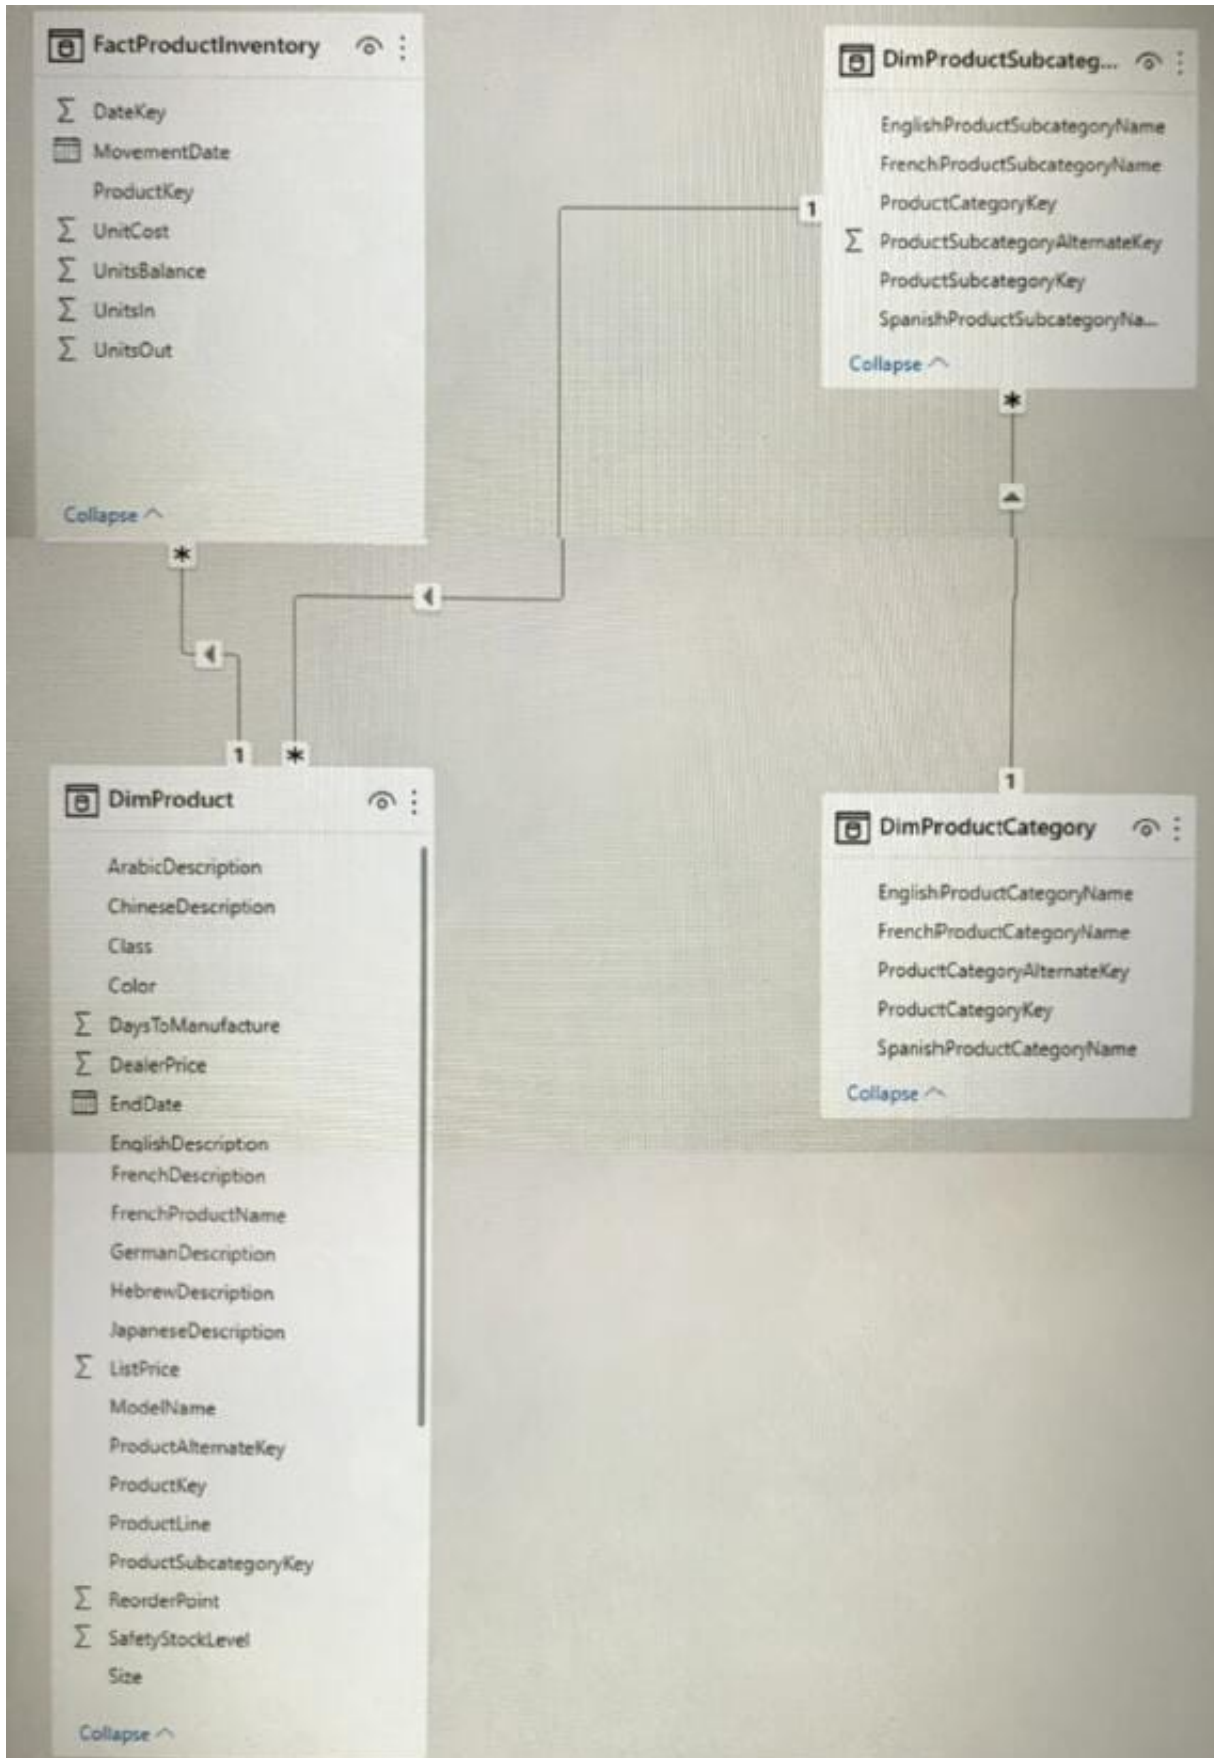

- A. organizational account
- B. Basic
- C. Web API
- D. Anonymous

Correct Answer: C

<https://learn.microsoft.com/en-us/power-query/connector-authentication#select-an-authentication-method>

QUESTION 2

You have the Power BI data model shown in the exhibit. (Click the Exhibit tab.) Users indicate that when they build reports from the data model, the reports take a long time to load.

You need to recommend a solution to reduce the load times of the reports. Solution: You recommend moving all the

measures to a calculation group. Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

You need to create the customized Power BI usage reporting. The Usage Metrics Report dataset has already been created. The solution must minimize development and administrative effort. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Correct Answer:

QUESTION 4

The IT group registers the Power BI tenant as a data source in Microsoft Purview.

You need to ensure that all the analysts can view the assets in the Power BI tenant. The solution must meet the technical requirements for Microsoft Purview and Power BI.

What should you do?

- A. Create a scan.
- B. Deploy a Power BI gateway.
- C. Search the data catalog.
- D. Create a linked service.

Correct Answer: A

QUESTION 5

Your company is migrating its current, custom-built reporting solution to Power BI.

The Power BI tenant must support the following scenarios:

40 reports that will be embedded in external websites. The websites control their own security. The reports will be consumed by 50 users monthly. Forty-five users that require access to the workspaces and apps in the Power BI Admin portal.

Ten of the users must publish and consume datasets that are larger than 1 GB. Ten developers that require Text Analytics transformations and paginated reports for datasets. An additional 15 users will consume the reports.

You need to recommend a licensing solution for the company. The solution must minimize costs. Which two Power BI license options should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. 70 Premium per user
- B. one Premium
- C. 70 Pro
- D. one Embedded
- E. 35 Pro
- F. 35 Premium per user

Correct Answer: BE

Since we need 45 users to have access to the workspaces and apps, 35 Premium Per user would not work because for the Premium Per User workspace content to be accessed we need that all users have Premium Per User. So even if we go for Premium Per User, then we need to purchase it for 70 users.

Also, since we want to publish reports to web and not embed to the app, I would not consider Embedded capacity.

Another important thing is to minimize the cost. We can use Premium capacity for publishing the reports to web, supporting Text Analytics transformations and paginated reports and having dataset more than 1GB. For the users who will be actively busy with development we can purchase 35 pro licenses (IMO 20 pro account is enough).
