QUESTION 1

What is an accurate statement about a hardware RAID implementation?

- A. Uses a specialized hardware controller installed on a storage array
- B. Uses CPU cycles of a compute system to perform RAID calculations
- C. Requires a RAID controller and operating system to be compatible
- D. Offers a low-cost solution for providing disk protection

Correct Answer: A

QUESTION 2

An application generates 4200 small random I/Os at peak workloads with a read/write ratio of 2:1. What is the disk load at peak activity for a RAID 6 configuration?

- A. 2800
- B. 5600
- C. 8400
- D. 11200

Correct Answer: D

QUESTION 3

What is an accurate statement about infrastructure discovery?

- A. Creates an inventory of infrastructure components and provides information about the components
- B. Standardizes on-going infrastructure management activities and assesses potential risks of the activities
- C. Classifies, organizes, and analyzes all infrastructure management best practices stored in data lakes
- D. Detects potential security attacks on a storage infrastructure and deploys specialized tools to eliminate the attacks

Correct Answer: A

QUESTION 4

How does an iSCSI initiator discover its targets?

- A. Initiator sends a query to an iSNS server for a list of available targets

- B. Initiator receives the iSCSI names of its targets from the primary DNS server
- C. Initiator uses the data center bridging exchange protocol for the discovery
- D. Initiator sends SCSI commands and the target responds by sending its name

Correct Answer: A

QUESTION 5

What is an accurate statement about a denial-of-service attack?

- A. Prevents legitimate users from accessing resources or services
- B. Intentional misuse of privileges to compromise data security
- C. Gaining unauthorized access to a user's accounts and data
- D. Captures a user's credentials and then sends to the attacker

Correct Answer: A
