QUESTION 1

Which lossless Ethernet functionality helps Converged Enhanced Ethernet (CEE) devices to convey and configure their features with the other CEE devices in the network?

A. Data center bridging exchange protocol

B. Enhanced transmission selection

C. Priority-based flow control
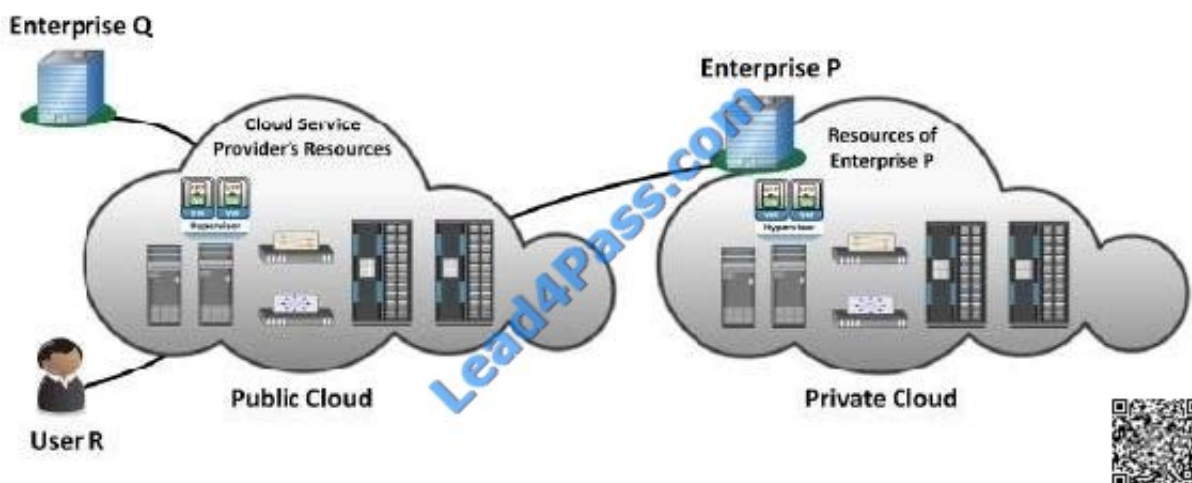

D. Congestion notification

Correct Answer: A

QUESTION 2

What describes a hybrid cloud?

A. Composed of distinct clouds that are bound together by standardized or proprietary technology

B. Composed of two or more distinct data centers that enable data and application portability

C. Combination of two distinct cloud infrastructures (on-premise and externally-hosted) that are managed together

D. Combination of a private cloud and a public cloud that are owned, managed, and operated by a single organization

Correct Answer: A

Hybrid Cloud

In a hybrid cloud model, the cloud infrastructure is a composition of two or more distinct cloud infrastructures (private, community, or public) that remain unique entities, but are bound together by standardized or proprietary technology that enables data and application portability (example, cloud bursting for load balancing between clouds). The hybrid model allows an organization to deploy less critical applications and data to the public cloud, leveraging the scalability and cost-effectiveness of the public cloud. The organization\\'s mission-critical applications and data remain on the private cloud

that provides greater security. EMC E10-001 Student Resource Guide. Module 13: Cloud Computing

QUESTION 3

What is a key advantage of deploying a three-site remote replication solution?

A. Ensures disaster recovery protection remains available even if the source or remote site failed

B. Provides the capability to recover data to any point-in-time

C. Requires very low network bandwidth to perform replication

D. Enables a consistent near zero RPO in the event of source and remote site failures

Correct Answer: A

QUESTION 4

Which backup architecture component maintains the backup catalog?

A. Backup server

B. Storage node

C. Backup client

D. Backup device

Correct Answer: A

QUESTION 5

What is a function of the FC-1 layer of the Fibre Channel (FC) protocol stack?

A. Defines data encoding

B. Provides FC addressing

C. Defines the physical interface

D. Provides the structure of data

Correct Answer: A
