-  **800,000+** Satisfied Customers

QUESTION 1

An application generates 4200 small random I/Os at peak workloads with a read/write ratio of 2:1.

What is the disk load at peak activity for a RAID 5 configuration?

- A.
2,800
- B.
5,600
- C.
8,400
- D.
11,200

Correct Answer: C

QUESTION 2

Which migration technique moves the active state of a virtual machine (VM) without powering off the VM?

- A. Push and pull
- B. VM snapshot
- C. Array-to-array
- D. Hypervisor-to-hypervisor

Correct Answer: D

QUESTION 3

What is a function of the FC-1 layer of the Fibre Channel (FC) protocol stack?

- A. Defines data encoding
- B. Provides FC addressing
- C. Defines the physical interface
- D. Provides the structure of data

Correct Answer: A

QUESTION 4

Which technique protects the data in cache from power failures?

- A. Vaulting
- B. Mirroring
- C. Prefetching
- D. Watermarking

Correct Answer: A

QUESTION 5

What is an example of an availability management task?

- A. Configuring LUN masking
- B. Enforcing capacity quotas for users
- C. Installing multipathing software
- D. Auditing of event logs

Correct Answer: C

Availability Management A critical task in availability management is establishing a proper guideline based on defined service levels to ensure availability. Availability management involves all availability-related issues for components or services to ensure that service levels are met. A key activity in availability management is to provision redundancy at all levels, including components, data, or even site levels. For example, when a server is deployed to support a critical business function, it requires high availability. This is generally accomplished by deploying two or more HBAs, multipathing software, and server clustering. The server must be connected to the storage array using at least two independent fabrics and switches that have built-in redundancy. Provision RAID-protected LUNs to the server using at least two front-end ports.

In addition, the storage arrays should have built-in redundancy for various components and should support local and remote replication.
