QUESTION 1

What is a characteristic of cloud service management?

- A. Adopting automation and workflow orchestration
- B. Enabling IT asset-specific management
- C. Separating management processes from service design
- D. Abstracting cloud service requirements and SLA

Correct Answer: A

QUESTION 2

What is a benefit of service orchestration?

- A. Reduced service provisioning time
- B. Enhanced service portability across clouds
- C. Improved conformity to service contract
- D. Automated service portfolio management

Correct Answer: A

QUESTION 3

A cloud service provider plans to implement data deduplication in their backup environment. The service provider has a network bandwidth and storage space constraint.

Which deduplication method should be deployed by the service provider?

- A. Source-based
- B. Target-based
- C. Post-process
- D. In-line

Correct Answer: A

QUESTION 4

Which statement characterizes the software-defined approach for managing resources?

- A. Abstracts the underlying infrastructure components and separates the management functions from the infrastructure components
- B. Provides a framework to list services, attributes of services, service-level commitments, terms and conditions for service provisioning, and prices of services
- C. Provides the automated arrangement, coordination, and management of various system functions in a cloud infrastructure to manage cloud services
- D. Specifies a set of component functions that can be called from a software component to interact with other software components

Correct Answer: A

QUESTION 5

What is a service contract?

- A. An agreement between provider and consumer that states the terms of service usage
- B. An agreement between provider and supplier that describes the service template specifics
- C. An agreement between provider and consumer that lists the conditions for greenfield service deployment
- D. An agreement between provider and supplier that states the terms and conditions of a balanced scorecard

Correct Answer: A
