QUESTION 1

A customer has an existing NAS implementation that is backed up in a local two-way configuration. The customer is concerned that the attached tape drive is stopping and starting frequently during the backup. However, they see benefit in the local two-way configuration and want to keep it.

Which solution would you recommend to address their concern?

A. VBB

B. DDS

C. DAR

D. NDMP2D

Correct Answer: D

QUESTION 2

You have been tasked with providing a file-sharing and storage solution for a remote office that has an IP-based network. No IT staff are available on the site; therefore minimal administrative overhead is a must.

Which technology would you recommend?

A. DAS

B. FC SAN

C. CAS

D. NAS

Correct Answer: D

QUESTION 3

A backup administrator wants to leverage the replication feature available on the storage array as an alternate source for backups. What is an advantage of this approach?

A. Removes the burden on the production LUNs during backup

B. Improves RPO

C. Enables backups to be performed without a storage node

D. Decreases storage utilization

Correct Answer: A

QUESTION 4

Which RAID type uses the full storage capacity of the hard disks in a RAID set?

A. RAID 0

B. RAID 0+1

C. RAID 1+0

D. RAID 5

Correct Answer: A

QUESTION 5

Which data deduplication level provides the greatest granularity?

A. Fixed block

B. File

C. Single instance

D. Variable block

Correct Answer: D
