QUESTION 1

You are creating a cloud infrastructure design for an organization. You learn that, for compliance reasons, the organization needs to maintain a separate set of infrastructures for certain deployed services. Which part of the design will be impacted by this requirement?

A. Number of service catalogs

B. Number of compute pools

C. Service catalog sizing

D. Over-commitment ratio

Correct Answer: B

QUESTION 2

What are general design considerations for inter-cloud links?

A. Internet connection, network service provider adjacent to the cloud provider, and application behavior

B. Router and load balancer session synchronization, Internet connection, and network service provideradjacent to the cloud provider

C. Application behavior, router and load balancer session synchronization, and Internet connection

D. Network service provider adjacent to the cloud provider, application behavior, and router and load balancersession synchronization

Correct Answer: B

QUESTION 3

Which infrastructure does VCE Vblock represent?

A. Brownfield

B. Traditional

C. Hyper-converged

D. Converged

Correct Answer: D

QUESTION 4

An architect is designing the compute resource pools for a cloud. As part of the deliverables, the architect has included

the standard specifications for the physical servers to be used. The organization has provided estimates for future growth but has concerns about whether these estimates are accurate. What should be included in the design to address these concerns?

A. A monitoring application and procedures for pool expansion

B. A chargeback application and orchestration workflows to auto-scale pools

C. A metering application and orchestration workflows to auto-scale pools

D. A configuration management application and procedures for pool expansion

Correct Answer: A

QUESTION 5

An organization is developing a cloud-native social-media website. The website will be written using elastic principles. When the website scales, it can add additional web, application and database instances to meet dynamic workload demand.

Which additional resources will be consumed by replication as the database layer expands.

A. Public IP addresses, CPU, and memory

B. CPU, memory, and network traffic

C. Network traffic, public IP addresses, and CPU

D. Memory, network traffic, and public IP addresses

Correct Answer: B
