QUESTION 1

When implementing QoS across a cloud network, how is storage traffic usually prioritized?

- A. Most important
- B. More important than tenant traffic but less important than management traffic
- C. More important than management traffic but less important than tenant traffic
- D. Least important

Correct Answer: C

QUESTION 2

An organization wants to have showback capability in their private cloud. Which cloud management platform component should be included in the cloud design to support this requirement?

- A. SSO
- B. Service catalog
- C. Metering application
- D. Monitoring application

Correct Answer: C

QUESTION 3

An organization is developing a cloud-native social-media website. The website will be written using elastic principles. When the website scales, it can add additional web, application and database instances to meet dynamic workload demand.

Which additional resources will be consumed by replication as the database layer expands.

- A. Public IP addresses, CPU, and memory
- B. CPU, memory, and network traffic
- C. Network traffic, public IP addresses, and CPU
- D. Memory, network traffic, and public IP addresses

Correct Answer: B

QUESTION 4

An organization plans to deploy many cloud-native applications that will generate a considerable amount of east-west traffic. The cloud-native applications will be deployed on hosts running hypervisors. Why would distributed routers be considered in this design?

- A. Enable network segment
- B. Improve network performance between hosts
- C. Minimize Internet traffic
- D. Protect against a physical router failure

Correct Answer: B

QUESTION 5

You are designing consumer compute resources in an onsite private cloud. During an assessment, you discover that the organization's IT staff wants secure access to the underlying host OS. What should be included in the design to support this requirement?

- A. Host IDS configuration Secure key infrastructure Bridged management network
- B. Perimeter firewall configuration VPN encryption Separate management network
- C. Host OS firewall configuration Central logging Physically isolated management network
- D. Host OS firewall configuration Secure key infrastructure Separate management network

Correct Answer: B
