QUESTION 1

You are adding an Avamar deduplication node to a customer's EMC NetWorker environment. Clients currently back up to tape and perform full backups on Sunday and incrementals on all other days.

In the new solution, these clients will back up to the deduplication node. The speed of recovery is important to the customer. Which changes may be required to the backup schedule?

- A. Perform Full on Sunday and Level 1 backups on all other days of each week
- B. No changes are required to the backup schedule
- C. Perform initial Full backup and Level 1 backups forever
- D. Perform Full backups every day

Correct Answer: D

QUESTION 2

A customer has a multi-node EMC Avamar server with eight active storage nodes. They are currently at 85% GSAN capacity and receiving capacity warning messages. The customer would like to purchase four additional nodes for the system.

What is a best practice for adding capacity?

- A. Add two nodes at a time to the existing server
- B. Add one node at a time to the existing server
- C. Migrate capacity to a different server if available
- D. Acquire a new server with sufficient capacity

Correct Answer: A

QUESTION 3

A customer requires support for 60 MTrees on a single Data Domain System. At most, 50% of the MTrees will be active at the same time.

Which Data Domain system fulfills the customer's requirements?

- A. DD7200
- B. DD2500
- C. DD870
- D. DD160

Correct Answer: A

QUESTION 4

In an EMC Data Domain environment, what is considered a valid Archiver replication type?

- A. Archiver-to-Archiver Directory
- B. Appliance-to-Archiver Collection
- C. GDA-to-Archiver Collection
- D. GDA-to-Archiver Directory

Correct Answer: A

QUESTION 5

An EMC NetWorker customer is experiencing poor backup performance. Your analysis determines that significant host resources are used to manage low-level network handshaking operations during backup. Based on EMC recommendations, what can be done to alleviate the handshake issue?

- A. Install 3 TCP offload engine card
- B. Install a second network interface card
- C. Upgrade the LAN
- D. Upgrade the network driver

Correct Answer: B
