-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

A customer is currently running Data Protection Advisor. Over time, concerns have been expressed about performance degradation. After a complete review, you discovered that performance was being impacted due to data gathered by Collectors being maintained with configuration data.

What is the most likely reason for keeping these two types of data separate?

- A. Dynamic nature and large size
- B. Static nature and large size
- C. Dynamic nature and small size
- D. Static nature and small size

Correct Answer: A

QUESTION 2

You are designing an EMC Data Protection Advisor (DPA) solution for a large NetWorker customer using both DPA clustering and replication. What is a consideration when determining the server layout for

application and datastore servers in this virtual environment?

- A. Install the master and slave datastores on different physical hosts
- B. Implement the master application and datastore servers on the same virtual host
- C. Connect a DPA datastore to each cluster VLAN in the solution
- D. Configure a spare server to have both standby datastore and application roles

Correct Answer: A

QUESTION 3

A customer has an existing EMC Data Domain system that backs up their web services data. Their business is growing and they would like to expand storage by adding two ES30 hard drive shelves to their existing ES20 shelf set.

Which option can be used for increasing capacity?

- A. Install a separate shelf set for the ES30 shelves
- B. Add only one additional ES30 shelf to the shelf set
- C. Use Infiniband style cables between the ES20 and ES30 shelves in the shelf set
- D. Install one additional ES20 to allow the additional two ES30 shelves to the existing shelf set

Correct Answer: A

QUESTION 4

An EMC Avamar customer has a 750 GB Oracle server and a file server to back up. What is a consideration when designing an Avamar Virtual Edition (AVE) solution?

- A. Average size of the file system and the database.
- B. Ratio between the largest file and the largest tablespace.
- C. Ratio between the size of the file system and the database.
- D. Average size of the largest file and the largest tablespace.

Correct Answer: C

QUESTION 5

Scenario

A customer is looking to modernize their backup infrastructure. The current environment consists of a single centralized data center and several remote sites. The centralized data center hosts all core services and applications. The remote office primarily consists of sales personnel with 4000 users in North America, 500 in Europe, and 300 in Asia using file servers.

The current backup environment at the primary site uses CommVault backing up to a Fibre Channel tape library that contains four LTO-4 tape drives. Currently they are backing up a number of file servers as well as several databases that have average change rates of 7% daily. Remote office backups are currently performed by having users copy files to regional file servers that are then backed up to tape.

In the past few months, the customer has experienced problems with getting backups to finish within their defined windows as well as issues with the tape library hardware. They now have concerns about gaps in their backup coverage as well as the reliability of the tape media. In addition, an internal audit shows a large amount of user-generated data is unprotected on remote user laptops.

The customer is looking for a common platform to standardize their backups. They want a solution which allows for a centralized infrastructure so that they do not need to rely on remote resources to address hardware and software issues. The other goal is to move away from tape to a more reliable disk-based solution.

Refer to Scenario .

The customer has concerns about Avamar's ability to handle the backups of their databases.

Which recommendation should be made?

- A. Integrate a Data Domain appliance with Avamar
- B. Add additional storage nodes to the Avamar system
- C. Implement image backups using change block tracking
- D. Increase file cache sizes on database clients

Correct Answer: A
