QUESTION 1

What configuration is required for clients to have the same user identity on both source and target clusters?

A. Both clusters must be connected to the same LDAP and AD servers

B. Both clusters must have the same SMB shares and NFS exports

C. The SyncIQ policy must be a \\'copy\\' policy

D. The SyncIQ policy must be a \\'sync\\' policy

Correct Answer: A

QUESTION 2

You are onsite to deploy an EMC Isilon cluster that is already racked and cabled. What serial settings must be used to initially configure this cluster?

A. 9,600 bps, 8 data bits, no parity, 1 stop bit, hardware flow control

B. 38,400 bps, 8 data bits, no parity, 1 stop bit, software flow control

C. 115,200 bps, 8 data bits, no parity, 1 stop bit, hardware flow control

D. 128,000 bps, 8 data bits, no parity, 1 stop bit, software flow control

Correct Answer: C

QUESTION 3

What client protocols are supported to provide access to EMC Isilon clusters?

A. SMB, NFS, HTTP, FTP, and HDFS

B. AFP, CIFS, NFS, TCP, and UDP

C. SMB, NFS, HTTP, FTP, and SMTP

D. TFTP, CIFS, NFS, SSL, and TCP

Correct Answer: A

QUESTION 4

A customer is worried about the possibility of exceeding the node pool storage capacity when a data rebuild is required from a failed hard drive.

What configuration setting(s) should be verified and included when you configure the cluster?

A. Enable VHS, and deny data writes to reserved disk space

B. Enable L3 cache

C. Enable GNA

D. Increase the node pool default requested protection level

Correct Answer: A

QUESTION 5

You are configuring DNS to work with SmartConnect zones. What is the best practice recommendation to the customer?

A. Set TTL on NS records to zero

B. Use Linux-based DNS

C. Use Windows-based DNS

D. Set TTL on A records to zero

Correct Answer: A
