QUESTION 1

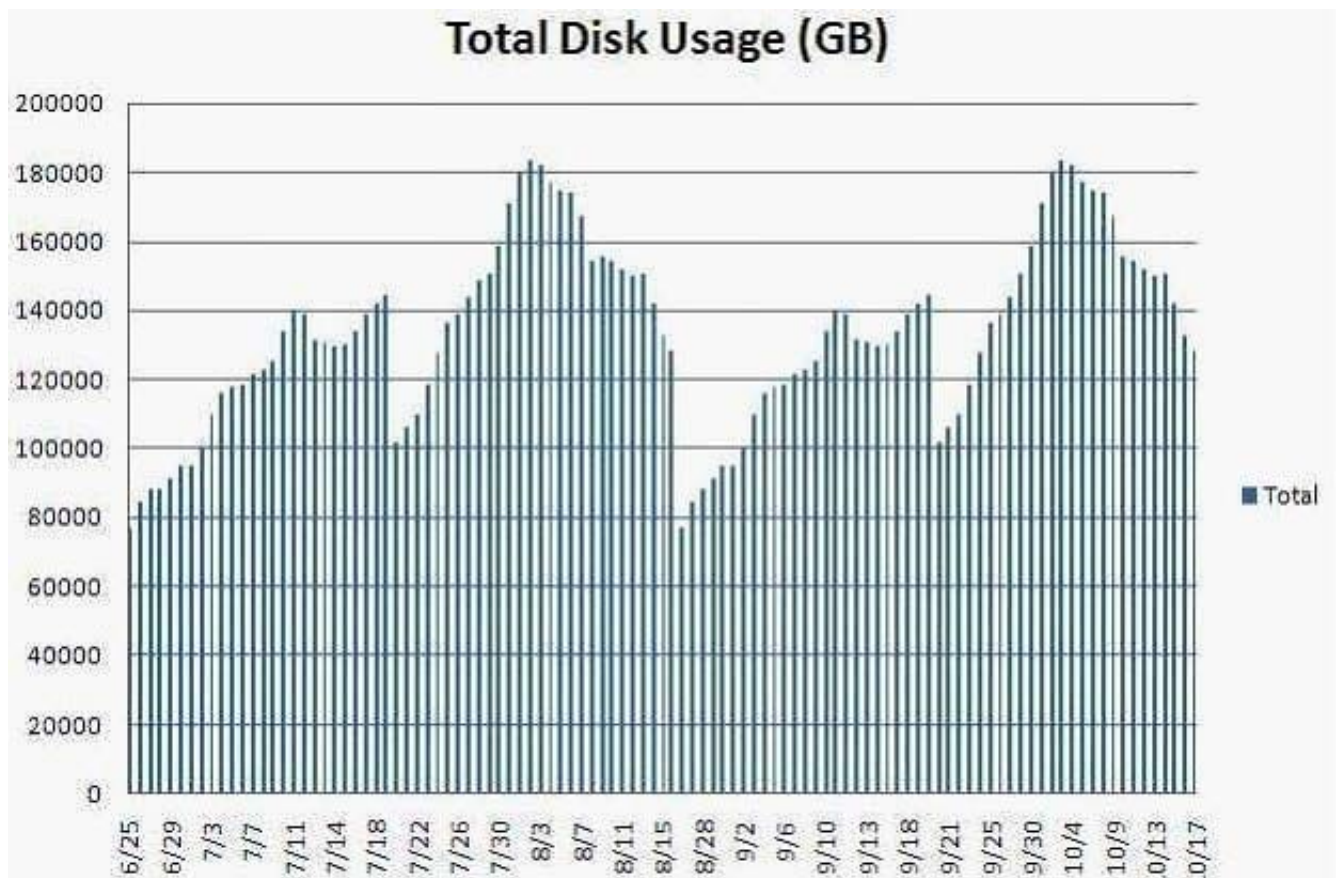

A customer is running NFS backups with eight Symantec NetBackup Media Servers. The EMC Data Domain system is receiving data at 700 MB/s. What is a possible cause if the system is also writing to disk at 700 MB/s?

- A. Network bottlenecks
- B. Encrypted data streams
- C. Too many media servers
- D. Not enough connections

Correct Answer: B

QUESTION 2

On 8/15, what causes the drop in disk usage on the EMC Data Domain system as illustrated in the exhibit?

- A. Data was deleted on the system and file system cleaning completed
- B. Data was deleted on the system and no longer used

- C. Better deduplication ratios and less storage was needed
- D. More storage was added and allowed for higher compression

Correct Answer: A

QUESTION 3

Which tab in the Enterprise Manager GUI is used to configure IPMI on an EMC Data Domain system?

- A. Maintenance
- B. System Settings
- C. Hardware
- D. Status

Correct Answer: A

QUESTION 4

An EMC Data Domain administrator needs to replicate the entire /data/col1 area from source to destination and be considered a true form of disaster recovery.

Which replication method should be used?

- A. Collection
- B. MTree
- C. Directory
- D. Managed Replication

Correct Answer: A

QUESTION 5
