**QUESTION 1**

What is the default user mapping method available to a VNX?

A. Usermapper

B. Microsoft SFU

C. VNX UNIX User Management

D. Local Files

Correct Answer: A

**QUESTION 2**

If a company is using Microsoft Exchange 2007 in a VNX for Block environment, what is the recommended page size?

A. 4 kB

B. 8 kB

C. 16 kB

D. 32 kB

Correct Answer: B

**QUESTION 3**

A storage administrator is using VDMs on a new VNX Unified system. The administrator received a request to create a new VDM with a new file system from an internal business unit with their own UNIX domain.

How can VDMs support this requirement?

A. Each VDM can be part of a single UNIX domain

B. Each VDM can be part of multiple UNIX domains

C. Only one domain namespace can be used per Data Mover

D. Only one domain namespace for all VDMs can be used

Correct Answer: A

**QUESTION 4**

Which state allows the user to delete an FLR-enabled file?

A. Expired

B. Locked

C. Append

D. Not-locked

Correct Answer: A

**QUESTION 5**

A storage administrator is adding a third VNX system (VNX3) to a secondary site. The third system will be part of an active/active VNX IP replicating cluster. The administrator has set up the usermapper as a secondary usermapper (VNX2) pointing to the primary usermapper (VNX1).

When will data on the secondary usermapper (VNX2) get updated if a new unmapped user is accessing the new VNX system (VNX3)?

A. Not until the user accesses the CIFS server located on VNX2 B. As soon as the primary usermapper (VNX1) has generated an entry for the user

C. At 0:00 AM every night when the primary usermapper (VNX1) updates all the secondary usermappers (VNX2/VNX3)

D. As soon as an export of the database from the primary usermapper (VNX1) is imported to the VNX2 usermapper

Correct Answer: A
