QUESTION 1

What will happen if compression is enabled on a thick LUN?

- A. The thick LUN will be migrated to a user-defined RAID group LUN
- B. The thick LUN will be migrated to a thin LUN in the same storage pool
- C. Both read and write cache will be disabled for the LUN
- D. Compression will start immediately on the thick LUN.

Correct Answer: B

Explanation:

Data Compression – RAID Group and Pool LUNs

- System initiates a migration on behalf of the user
 - ▶ The migration is private, not managed by the user
 - ▶ Counts against LUN migration feature limits
 - ▶ RAID Group LUN is in migrating state
 - ▶ System hides migration for thick LUN and shows compressing state
 - Destination pool
 - ▶ RAID group LUN: provided by the user
 - ▶ Thick LUN: the same pool where Thick LUN resides
 - A thin destination LUN is created for the user in the destination pool
 - ▶ Slices are reserved in the pool to ensure LUN can be copied to pool
 - Source LUN is unbound when initial compression is completed
-

QUESTION 2

What is required when configuring a Data Mover interface?

- A. Broadcast address
- B. NTP address
- C. NIS address

D. KDC address

Correct Answer: A

QUESTION 3

An administrator has installed a new VNX and configured an interface using IP address 10.10.10.50 for CIFS file sharing over 10 gigabit Ethernet link. The administrator has also created two CIFS servers: one for production one for testing. They are currently able to access only the production CIFS server.

What is the most likely source of this problem?

- A. A firewall is interfering with traffic to test network
- B. Only one CIFS server is supported per interface
- C. No route to the test network is currently available
- D. The CIFS server used for testing needs to join the domain

Correct Answer: B

QUESTION 4

What is the maximum number of DNS domains that can be configured per Data Mover?

- A. 1
- B. 2
- C. 4
- D. Unlimited

Correct Answer: D

QUESTION 5

What is the default user mapping method available to a VNX?

- A. Usermapper
- B. Microsoft SFU
- C. VNX UNIX User Management
- D. Local Files

Correct Answer: A
