QUESTION 1

Which method applies a lifecycle to an instance of a IDfSysObject?

A. attach()

B. attachPolicy()

C. applyLifecycle()

D. attachLifecycle()

Correct Answer: B

QUESTION 2

What is a WSDL file used to define?

A. a web service interface contract

B. the deployment description for a web service

C. the credentials for web service authentication

D. the dmc_jar used for implementation of a web service

Correct Answer: A

QUESTION 3

The following XSL builds a query: Line 5 is supposed to store the result of the DQL query as a string and pass that as a parameter to the XDQL template function.

Which code belongs in line 5?

A.

B.

C.

D.

Correct Answer: D

QUESTION 4

You have a handle to an IDfVirtualDocument using the followng code: Which steps are the recommended way to only add the root node of a virtual document to the operation (i.e. in the call operaton.add(...))?

A. 1. Execute the statement: operation.add(vDoc);2. Do nothing since DFC always adds the virtual document root only. If children are neededas well, they must be explicitly added by traversing the virtual document.

B. 1. Execute the statement: operation.add(vDoc);2. Remove the child nodes explictly from the root node (node.removeChildren()) since DFCadded them automatically.

C. 1. Execute the statement: operation.add(sysObject);2. Do nothing since there is no difference between adding a regular sys object and just thevirtual document root.

D. 1. Remove the child nodes from vDoc in memory (i.e. not saving to repository) and thencall2. Execute the statement: operation.add(vDoc);

Correct Answer: C

QUESTION 5

How should you deploy a TBO to the respository?

A. Using IDfClient.newModule() only

B. Using Documentum Application Installer only

C. Using both Documentum Application Installer and IDfClient.newModule()

D. Using Documentum Application Installer, IDfClient.newModule() andIDfClient.newService()

Correct Answer: B
