QUESTION 1

In a VNX Unified system, how can the lost+found and etc directories be hidden from the client when exporting a file system?

- A. Export the file system at the subdirectory level and not the root file system
- B. Use FDISK to mark the partition active prior to exporting
- C. Leave the Root Hosts section empty when exporting
- D. Select the Host Access Read-only check box prior to exporting.

Correct Answer: A

QUESTION 2

What is a characteristic of tree quotas?

- A. Quotas cannot be applied to the root of a file system
- B. Tree quotas can be set on existing directories
- C. A maximum of 4096 quota trees can be set on a single file system
- D. Tree quota policies are applied by default

Correct Answer: A

QUESTION 3

A customer wants to decrease the size of VNX pool LUNs presented to an MSCS cluster using the LUN shrink feature.

What do you advise?

- A. The LUN shrink feature is not supported with MSCS clusters.
- B. LUN shrink is only supported with stand-alone hosts.
- C. The accessible volume space on the host must be reduced first.
- D. The LUN shrink feature will allow them to reduce LUN sizes for this cluster.

Correct Answer: A

QUESTION 4

Which VNX RAID type is suggested for the greatest data protection at the greatest cost in disk space?

- A. RAID 1/0
- B. RAID 5
- C. RAID 6
- D. RAID 0

Correct Answer: A

QUESTION 5

You are exporting a file system from a VNX Unified system at the subdirectory level. What is a key consideration?

- A. It is a best practice to configure group and user permissions for the subdirectory.
- B. The file system must be exported again if the user and group permissions are modified.
- C. When an export is deleted, subdirectories are automatically destroyed.
- D. The lost+found and etc directories become visible to the client.

Correct Answer: A
