QUESTION 1

What is the maximum number of hosts supported in a VxRail Stretched Cluster?

- A. 15
- B. 16
- C. 31
- D. 32

Correct Answer: C

QUESTION 2

The Market Place on a VxRail Manager is empty on a newly deployed system. Testing shows that the Internet is reachable through proxy in the management network. Which action should be taken to correct this situation?

- A. VxRail Manager has no proxy support.
- B. Upgrade to latest version and add proxy configuration manually.
- C. Manually add the proxy information in the VxRail Manager configuration
- D. Reset the appliance and redeploy with proxy information filled in the deployment process.

Correct Answer: B

QUESTION 3

A VxRail deployment has just been completed but the vSAN performance statistics are not available for the cluster or virtual machines.

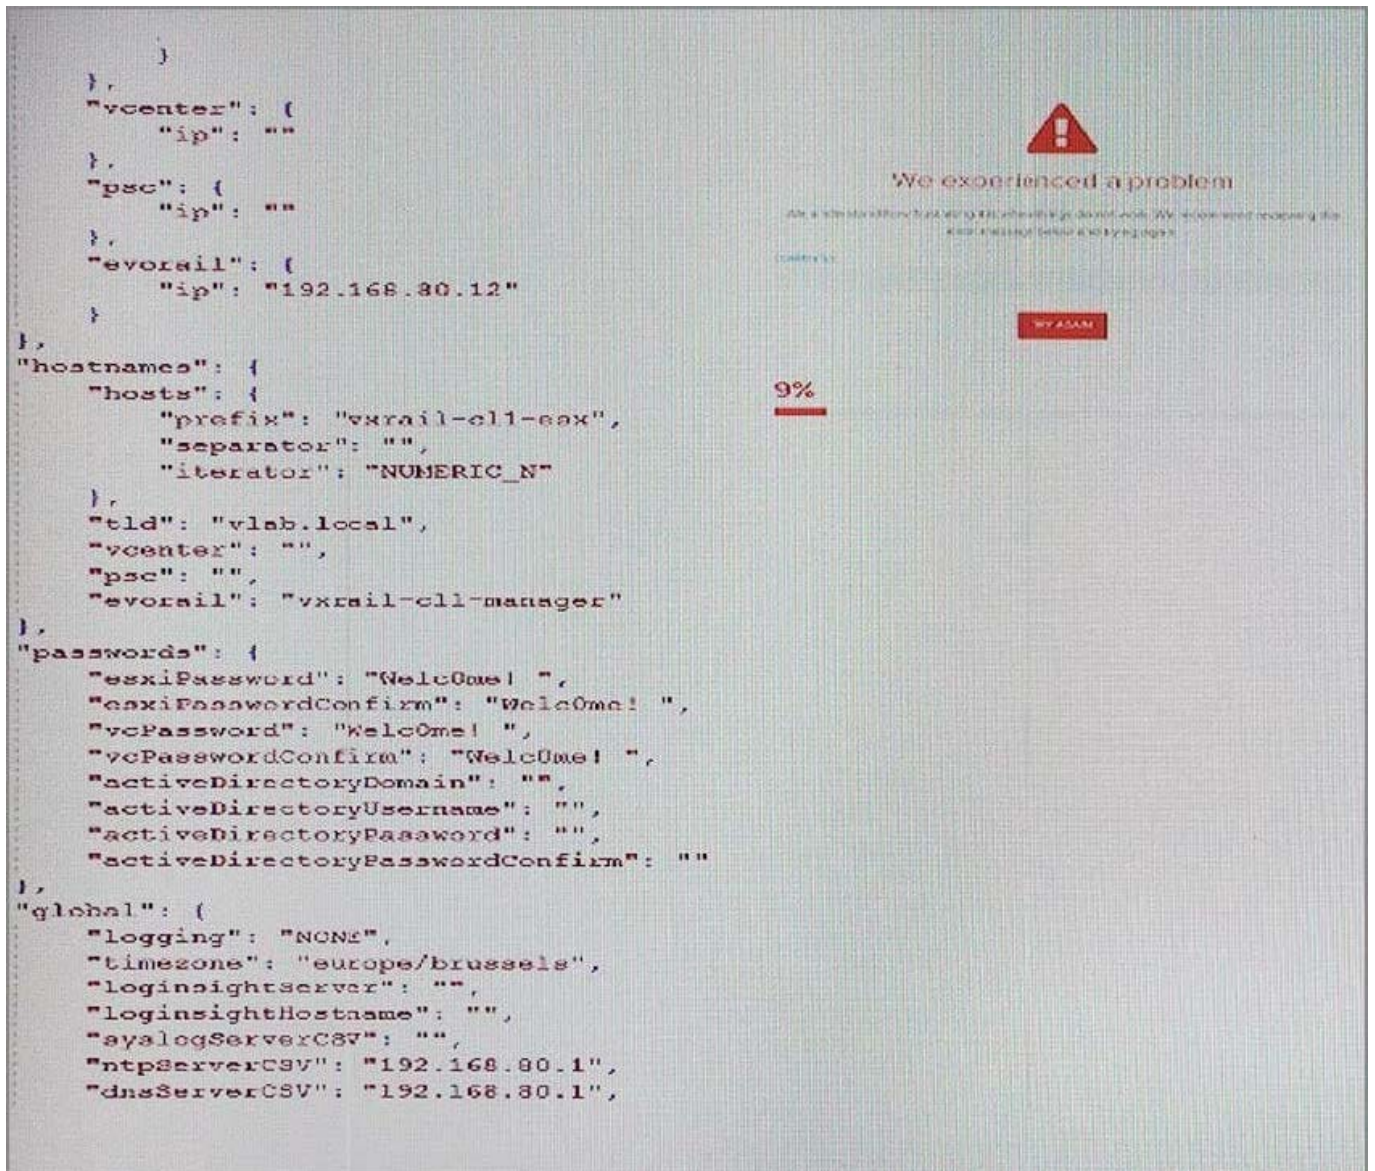

What is the reason for this situation?

- A. Data has not been populated
- B. Performance service has not been manually enabled
- C. vSAN performance hot-fix has not been applied
- D. Monitoring policy has not been created

Correct Answer: D

QUESTION 4

During a VxRail installation, the deployment fails at 9%. Based on the exhibit, what could be the reason for this failure?

- A. Domain name .local is not supported
- B. Password field has an extra space
- C. vCenter and PSC information is missing
- D. Timezone is in an incorrect format

Correct Answer: C

QUESTION 5

An all-flash VxRail cluster has just been deployed. When attempting to enable compression, the option is grayed out. What is the cause of this situation?

- A. "Add disks to storage" is set to manual
- B. Erasure Coding is not enabled
- C. Erasure Coding is not disabled
- D. "Add disks to storage" is set to automatic

Correct Answer: D
