- A. Shapefiles do NOT support integer numbers
- B. Shapefiles round to the nearest whole number.
- C. Shapefiles change NULL values to zero.
- D. Shapefiles CANNOT store currency values.

Correct Answer: D

QUESTION 2

An ArcGIS Online user is beginning to work on a project that will involve multiple organizations. Each organization has its own ArcGIS Online subscription. The project requires that only the project team have access to the data, and any team member should be able to contribute to the project.

Which sharing option should the user select?

- A. Everyone
- B. Organization
- C. Group
- D. Organization and Group

Correct Answer: B

QUESTION 3

A GIS analyst has a feature class containing property boundaries and a table containing the names of the owners of that property. Many properties have more than one owner. The analyst must publish this data to ArcGIS Online and show which owners are associated with which property in a pop-up window.

What should the analyst set up before publishing?

- A. Join
- B. Relate
- C. Relationship class
- D. Spatial Join

Correct Answer: D

QUESTION 4

When a file geodatabase feature class is exported to a shapefile, which property can be lost?

- A. Spatial Reference
- B. Field names that contain numbers
- C. Attribute Domains
- D. Values in a float field

Correct Answer: C
