QUESTION 1

War Driving is the act of moving around a specific area, mapping the population of wireless access points for statistical purposes. These statistics are then used to raise awareness of the security problems associated with these types of networks.

Which one of the following is a Linux based program that exploits the weak IV (Initialization Vector) problem documented with static WEP?

- A. Airsnort
- B. Aircrack
- C. WEPCrack
- D. Airpwn

Correct Answer: A

QUESTION 2

During a DHCP handshake in an IPv4 network, which of the following messages contains the actual IP addressing information for the clients to use?

- A. DHCPDISCOVER
- B. DHCPACK
- C. REPLY
- D. SOLICIT

Correct Answer: B

QUESTION 3

John is a network administrator and he is configuring the Active Directory roles in the primary domain controller (DC) server. Whilst configuring the Flexible Single Master Operation (FSMO) roles in the primary DC, he configured one of the roles to synchronize the time among all the DCs in an enterprise. The role that he configured also records the password changes performed by other DCs in the domain, authentication failures due to entering an incorrect password, and processes account lockout activities. Which of the following FSMO roles has John configured?

- A. RID master
- B. PDC emulator
- C. Domain naming master

D. Schema master

Correct Answer: B

QUESTION 4

An organization deployed Microsoft Azure cloud services for running their business activities. They appointed Jamie, a security analyst for performing cloud penetration testing. Microsoft prohibits certain tests to be carried out on their platform. Which of the following penetration testing activities Jamie cannot perform on the Microsoft Azure cloud service?

- A. Post scanning
- B. Denial-of-Service
- C. Log monitoring
- D. Load testing

Correct Answer: B

QUESTION 5

Software firewalls work at which layer of the OSI model?

- A. Data Link
- B. Network
- C. Transport
- D. Application

Correct Answer: A
