D. Firewall

Correct Answer: CD

QUESTION 3

In a complex network, Router transfers data packets by observing some form of parameters or metrics provided in the routing table. Which of the following metrics is NOT included in the routing table?

A. Bandwidth

B. Delay

C. Load

D. Frequency

Correct Answer: D

QUESTION 4

A firewall is a combination of hardware and software, used to provide security to a network. It is used to protect an internal network or intranet against unauthorized access from the Internet or other outside networks. It restricts inbound and outbound access and can analyze all traffic between an internal network and the Internet. Users can configure a firewall to pass or block packets from specific IP addresses and ports. Which of the following tools works as a firewall for the Linux 2.4 kernel?

A. Stunnel

B. IPChains

C. IPTables

D. OpenSSH

Correct Answer: C

QUESTION 5

You work as a computer operator for BlueWells Inc. The company has a Windows-based network.

You find out that someone has manipulated your email account, as some of your mails have been deleted. You suspect that your password has been hacked by someone. You inform about this to Mark, who is a Security Administrator. After diagnosing your system, Mark finds a log file that contains lots of text including username and password. Mark tells you that someone has installed software on your system that is recording all the keyboard strokes in a predefined log file. Which of the following software is Mark discussing about?

A. Spyware

B. Keylogger

C. Anti-Virus

D. Adware

Correct Answer: B
