QUESTION 1

In trace route results, what is the significance of an * result?

- A. A listening port was identified.
- B. A reply was returned in less than a second.
- C. The target host was successfully reached.
- D. No reply was received for a particular hop.

Correct Answer: D

QUESTION 2

When are Group Policy Objects (GPOs) NOT applied automatically to workstations?

- A. At 90-minute intervals
- B. At logon
- C. Every time Windows Explorer is launched
- D. At boot-up

Correct Answer: C

QUESTION 3

Which of the following ports is the default port for Layer 2 Tunneling Protocol (L2TP)?

- A. TCP port 443
- B. UDP port 161
- C. TCP port 110
- D. UDP port 1701

Correct Answer: D

QUESTION 4

You have implemented a firewall on the company's network for blocking unauthorized network connections. Which of the following types of security control is implemented in this case?

- A. Detective

B. Preventive

C. Directive

D. Corrective

Correct Answer: B

QUESTION 5

With regard to defense-in-depth, which of the following statements about network design principles is correct?

A. A secure network design requires that systems that have access to the Internet should not be accessible from the Internet and that systems accessible from the Internet should not have access to the Internet.

B. A secure network design requires that networks utilize VLAN (Virtual LAN) implementations to insure that private and semi-public systems are unable to reach each other without going through a firewall.

C. A secure network design will seek to provide an effective administrative structure by providing a single choke-point for the network from which all security controls and restrictions will be enforced.

D. A secure network design will seek to separate resources by providing a security boundary between systems that have different network security requirements.

Correct Answer: D
