QUESTION 1

Consider the given lines of code. `package ucert class memberaccess { public int mem = 10; }` Which of the following can directly access the variable `mem`?

- A. Any class
- B. Any class that extends the `memberaccess` class
- C. Only the `memberaccess` class
- D. Any class in the package `ucert`

Correct Answer: D

QUESTION 2

You work as a Software Developer for BlueTech Inc. You create code using EJB 3.0. You want to ensure that each new record is checked for validation before it is inserted into the database. Which of the following callback methods will you use to write the logic for validation?

- A. `PostUpdate`
- B. `PreUpdate`
- C. `PostLoad`
- D. `PrePersist`

Correct Answer: D

QUESTION 3

Identify whether the given statement is true or false. "When an exception occurs in a try block, each catch statement following the try block is inspected in sequential order, and the last one whose type matches that type of exception is executed."

- A. False
- B. True

Correct Answer: A

QUESTION 4

Which of the following statements are true?

Each correct answer represents a complete solution. Choose all that apply.

- A. StringBuffer is thread safe, but StringBuilder is not.
- B. The String class is final.
- C. StringBuilder offers faster performance than StringBuffer.
- D. The size of the String can be obtained using the length property.

Correct Answer: ABC

QUESTION 5
