100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

When virtual machine network is obstructed on FusionCompute, which of the following is a possible fault point? (Multiple choice)

- A. the PV driver is not installed on the virtual machine
- B. The virtual machine does not have a network card
- C. The network card is not enabled
- D. Virtual machine firewalls Limit network traffic

Correct Answer: ABCD

---

**QUESTION 2**

B companies need to enable the access control on the cluster's virtual machine resource, the following description about the virtual machine resources, which are the wrong? (Multiple choice)

- A. The network QoS policy provides bandwidth configuration control ability and does not support traffic throttling between virtual machines on the same host.
- B. If the host memory is sufficient, the virtual machine's memory requests can be unrestricted; if the host memory is low, then allocate according to the memory level and share
- C. You can assign CPU individual physical cores to a single virtual machine.
- D. You can set the resources' usage limit on Virtual machines, including CPU, memory, network, disk IOPS and so on.

Correct Answer: AD

---

**QUESTION 3**

What are the following features of the Neutron component in open source OpenStack? (Multiple choice)

- A. LB
- B. DVR
- C. FW
- D. VPN

Correct Answer: ABCD

---

## QUESTION 4

Which layers as the following are included in the Huawei Cloud Data Center Service Architecture Hierarchical Model? (Multiple Choice)

- A. The infrastructure layer, such as servers, storage, networking products and so on.
- B. Virtualization layer, the realization of virtualization resource pool.
- C. Cloud service layer, blending virtualization resource pool, to realize the centralized management and allocation of resources.
- D. Application layer, support all types of cloud services.

Correct Answer: ABCD

---

## QUESTION 5

Which is wrong description of the FusionStorage Server Hardware Selection?

- A. FusionStorage support to be deployed in the Huawei series of servers, do not support the use of other vendor servers for deployment and expansion.
- B. FusionStorage supports main memory types: SATA/NLSAS Disk, SAS Disk, SSD Disk and SSD Card.
- C. The choice of FusionStorage Cache type can be: No Cache, SSD disk and SSD card, NVDIMM.
- D. FusionStorage storage network type selection: 10 Gigabit or Gigabit Ethernet (10GE/GE) and IB networks.

Correct Answer: A
