QUESTION 1

Which of the following description about the FusionStorage MDC module is wrong?

- A. MDC (Metadata Controller) is a highly reliable cluster, through HA (High Availability) mechanism to ensure the high availability and high reliability of the entire system.
- B. MDC through the ZooKeeper cluster, to achieve the reliable preservation of metadata.
- C. The MDC communicates with the VBS (Virtual Block System) to realize the capacity expansion, status query and maintenance of the system.
- D. MDC through message exchange between the OSD (Object Storage Device), VBS to implement the acquisition and notification of the OSD, VBS node status changes.

Correct Answer: C

QUESTION 2

In Huawei FusionAccess DaaS system multi-tenant mode, if sharing a license server, which of the following description is correct? (Multiple choice)

- A. It is recommended that the operator's management network be isolated from the tenant network
- B. ITA, HDC and WI need to enable dual-NIC, and the license server is in the same network
- C. Each tenant can have a separate VLAN or multiple tenants are divided into the same VLAN
- D. The tenant can monopolize ITA, WI/HDC/DB, AD/DNS/DHCP, have separate VLAN, do not share
- E. with other tenants

Correct Answer: ACD

QUESTION 3

Under the Huawei FusionAccess DaaS scenario, the general requirements of the network logic isolation between the tenant to ensure security, to avoid attacks. Which of the following is a reasonable network isolation measure? (Multiple Choice)

- A. Each tenant enjoys a single cluster resource for physical network isolation.
- B. Multi-tenant sharing cluster resources, for management considerations, the two-tier isolation and three-tier isolation do not need to be deployed at the same time.
- C. When multi-tenant sharing cluster resources, you can adopt VPN isolation or ACL isolation on the Layer 3 network in the data center.
- D. When multi-tenant sharing cluster resources, the virtualization layer network uses the VLAN- level isolated.

Correct Answer: ACD

QUESTION 4

The Glance component in Huawei FusionSphere OpenStack provides basic image management functions such as create, query, delete, and download. Which of the following are the backend storage supported directly by Glance? (Multiple Choice)

- A. Swift
- B. NFS
- C. Local disk
- D. UDS

Correct Answer: ACD

QUESTION 5

Which of the following description about Huawei backup products eBackup feature is wrong?

- A. eBackup In addition to the first full backup, the rest of the backup is incremental backup.
- B. eBackup can backup the container as a unit to be specified backup VM, backup automatically discovered containers new VM; containers can be a cluster, data storage,etc.
- C. eBackup supports LAN-Free backup and recovery, but requires eBackup to be deployed on a physical server and requires a good network planning.
- D. eBackup positioning is a virtualized backup, therefore, can not achieve file-level granularity or virtual machine disk granularity data recovery.

Correct Answer: D
