## QUESTION 1

Single selection Huawei's converged storage has the function of parallel and fast data reconstruction. Data fragments are scattered in the resource pool. After a hard disk fails, the Automatic and parallel reconstruction within the entire resource pool, only the actual data is reconstructed, and no separate hot spare disk is required.

- A. True
- B. False

Correct Answer: B

---

## QUESTION 2

Which of the following options does not belong to the single-selection structure of Huawei's distributed storage network architecture

- A. Management network
- B. Back-end storage network
- C. Tenant Network
- D. Cluster storage network

Correct Answer: D

---

## QUESTION 3

The Oceanstor 9000 big data storage system includes multiple subsystems. Which subsystem is used for file storage?

- A. WushanFS
- B. WushanSQL
- C. FusionInsightHadoop
- D. Management subsystem

Correct Answer: A

---

## QUESTION 4

The following is the correct statement about Huawei hybrid flash storage SmartQos I/O priority scheduling:

- A. The I/O priority is based on the priority of the LUN where the IO is located. The priority of the LUN is determined by the user according to The business importance of deployment on the LUN is determined
- B. When the hard disk occupancy rate is too high, in order to ensure the reliability of the hard disk, the system will add

time to the low priority I/O Delay to control, and try not to affect high-priority I/O

C. I/O priority scheduling resources include front-end host concurrent resources, back-end hard disk concurrent resources, CPU computing resources and cache resources

Correct Answer: ABC

---

## QUESTION 5

When configuring the InfoAllocator feature, an A is configured for the user group group1 Quota (quota type: capacity quota, quota method: mandatory quota, hard value: 10GB), user quota-user1 configured One B quota (quota type: capacity quota, quota method: mandatory quota, hard threshold:

20 GB), quota\_user2 user A C quota is configured (quota type: capacity quota, quota method: mandatory quota, hard threshold: 5 GB), quota\_user1 The user and quota-user2 belong to the group1 user group, which of the following option descriptions are correct ( )

- A. quota\_user2 users can use up to 10 GB
- B. quota\_user2 users can use the maximum capacity of 5 GB
- C. quota\_user1 users can use the maximum capacity of 20GB
- D. quota\_user1 users can use the upper limit of 10GB

Correct Answer: BD
