**QUESTION 1**

Which of the following are two important working stages in PPPoE protocol?

- A. Session Stage
- B. NCP
- C. LCP
- D. Discovery Stage

Correct Answer: AD

---

**QUESTION 2**

Which of the following statements disobey the basic principle of area division?

- A. If the ISP runs OSPF protocol in the whole province network, then one city can be taken as one area.
- B. In the network, there are some sub networks such as 110.1.1.0/24,110.1.2.0/24,110.1.3.0/24, 120.1.1.0/24,120.1.2.0/24 ,120.1.3.0/24.Then all the routers belonging to 110 network can be configured in one area.
- C. One network maybe includes high-end, mid-end and low-end routers. Generally, all of these routers will be in same area.
- D. Make all routers with larger routing-table into one area.

Correct Answer: ABD

---

**QUESTION 3**

The Ethernet switch working in store and forward mode drops the frame with length smaller than 64 bytes.

- A. True
- B. False

Correct Answer: A

---

**QUESTION 4**

Which of the following statements about layer 2 LAN switch are incorrect?

- A. LAN switch will modify the data link layer header of the packet and then forward it.
- B. LAN switch can learn Mac address automatically.
- C. LAN switch operates at data link layer.

D. LAN switch will modify the network layer header of the packet and then forward it.

Correct Answer: B

---

## QUESTION 5

Which of the following is not a feature of Segment Routing?

- A. Uses the source routing technology to provide fast interaction between the network and upper- layer applications.
- B. Segment Routing is a connection-oriented technology that maintains the connection status.
- C. By extending existing protocols (such as IGP), the existing network can be smoothly evolved.
- D. In addition, the centralized control mode of the controller and the distribution control mode of the forwarder are supported, and the balance between centralized control and distributed control is provided.

Correct Answer: D
