QUESTION 1

The nurse teaches a patient recovering from a total hip replacement that it is important to avoid:

- A. Putting a pillow between the legs while sleeping
- B. Sitting with the legs crossed
- C. Abduction exercises of the affected leg
- D. Bearing weight exercises on the affected leg for 6 weeks

Correct Answer: B

QUESTION 2

A nurse is not familiar with a particular solution ordered to irrigate a patient's wound. The appropriate action would be to:

- A. Check if the solution is available on the ward, and if so, use it to clean the wound
- B. Put a neat line through the order and re-write the solution more commonly used
- C. Check with the Pharmacist about the uses of the solution ordered
- D. Ask the patient what solution he would prefer to be used

Correct Answer: C

QUESTION 3

Which of the following is the most appropriate first action for the nurse to take for a pre-schooler who has fallen and has a hematoma formed on the temporal bone?

- A. Encourage a nap
- B. Give pain medication
- C. Apply ice and monitor vital signs
- D. Allow the child to continue activities

Correct Answer: C

QUESTION 4

A nurse has been working in a general hospital on the same medical unit for 6 years. The Behavioral Unit is desperately short staffed and the nurse is asked to work her shift in this other unit. What would be the expected response of the nurse to this request?

- A. "I will go to the unit and hopefully the behavioral health staff members will assist me with my assignment."
- B. "I cannot go. I have no previous behavioral health experience. I do not want to reduce the quality of patient care."
- C. "I have no previous behavioral health experience. I am willing to go and help with any duties that are similar to those I perform on my unit."
- D. "I should not be expected to float to another unit without a proper orientation. I will fill out an incident report if I am sent there."

Correct Answer: C

QUESTION 5

While preparing for a kidney biopsy the nurse should position the patient:

- A. Prone with a sandbag under the abdomen
- B. Lateral opposite to biopsy site
- C. Supine in bed with knee flexion
- D. Lateral flexed knee-chest

Correct Answer: A
