QUESTION 1

A switching network has been enabled with STP protocol. To provide fast access speed to the file server for most of the users, the switch that is directly connected with file server is configured as the root bridge.

A. True

B. False

Correct Answer: A

QUESTION 2

Which of the following situations will occur after multicast load balance is configured? (Select 3 Answers)

A. If there are no equal-cost unicast routes, multicast load balance will fail to function.

B. If group address-based load splitting is used, balanced entry distribution over equal-cost routes cannot be ensured because of hash algorithm limitations.

C. Balanced entry distribution over equal-cost routes can be ensured as long as multicast load balance is configured.

D. In multicast load splitting, traffic may not be balanced among equal-cost routes. This is because multicast load balance is based on multicast entries but not based on multicast data packets.

Correct Answer: ABD

QUESTION 3

Which of the following routers can initiate SPT switchover on a PIM-SM network? (Select 2 Answers)

A. Last-hop router

B. Intermediate router

C. RP

D. Source\\'s DR

Correct Answer: AC

QUESTION 4

Which statements about the Local-Preference attribute are true? (Select 2 Answers)

A. Based on BGP route selection rules, the Local-Preference attribute has a lower priority than the Preferred-Value attribute. This means that BGP compares Local-Preference attributes of routes after comparing Preferred-Value attributes of them.

B. The Local-Preference attribute of a BGP route defaults to 0.

C. The Local-Preference attribute is used to select an exit point from the local AS for data flows.

D. Based on BGP route selection rules, the Local-Preference attribute has a lower priority than the MED attribute. This means that BGP compares Local-Preference attributes of routes after comparing MED attributes of them.

Correct Answer: AC

QUESTION 5

OSPF supports the combination of a group of network segments. Such a group is also called an area. In other words, an area is a set of network segments.

A. True

B. False

Correct Answer: A
