## QUESTION 1

Which three functions are performed by a VSP G1000 Virtual Storage Director (VSD)? (Choose three.)

- A. It executes host I/O requests.
- B. It calculates parity.
- C. It manages cache segment usage.
- D. It moves data to/from cache.
- E. It executes software such as HDP or copy products.

Correct Answer: ACD

---

## QUESTION 2

A customer with a VSP G1000 is using HDT with SAS 15K drives and external storage. The customer wants the daytime response-sensitive workload to benefit from tiering. They also want to minimize the impact of relocations on the daytime operation itself.

In this scenario, which action will satisfy the requirements?

- A. Enable monitoring only during the daytime hours (9:00 AM to 5:00 PM) and only enable relocation at other times.
- B. Disable monitoring during daytime hours (9:00 AM to 5:00 PM)
- C. Enable active flash so that all relocations can be completed in short bursts.
- D. Use continuous mode with a 30-minute cycle time and define relocation during daytime hours (9:00 AM to 5:00 PM) with a low relocation speed.

Correct Answer: A

---

## QUESTION 3

When testing an external LUN with default mapping on two paths, performance appears constrained and the utilization of the RAID group in the external storage system never exceeds 35% busy no matter how many test threads are generated. You want to increase the utilization of the external RAID group.

Which two actions will accomplish this task? (Choose two.)

- A. Increase the external path LUN queue depth setting.
- B. Increase the number of LUNs mapped from the external RAID group.
- C. Change Cache Mode to "Disabled".
- D. Increase the server HBA LUN queue depth to 64.

Correct Answer: AC

---

## QUESTION 4

You are sizing a VSP G4000 for a customer who requires good performance but has a very limited budget. You now must select a cache size between 64 GB and 128 GB.

Which three conditions will affect your selection in this situation? (Choose three.)

- A. The customer plans to use Cache Logical Partitions (CLPRs)
- B. The customer environment is mainly VMware.
- C. The number of LDEVs that are available.
- D. The customer will use ShadowImage.
- E. The number of connected hosts.

Correct Answer: ACE

---

## QUESTION 5

You need to run a benchmark test to verify the performance of a new multi-user database storage implementation before loading the real data.

What are three features you will need in the benchmark/workload generator to accomplish this task? (Choose three.)

- A. variation of thread count
- B. variation of sequential and random access
- C. variation of RAID level
- D. variation of HBA queue depth
- E. variation of read and write

Correct Answer: CDE
