**QUESTION 1**

A customer has an application that must have a second complete (zero RPO) copy of the data, The second site is 70km away. It is a multi-task application and has strong SLAs. Which two solutions should the customer consider to ensure that overheads are kept to a minimum? (Choose two.)

- A. 2 x USP running TrueCopy Asynchronous linked by DWDM
- B. 2 x USP running TrueCopy Synchronous linked by 2 x OC-3
- C. 2 x AMS1000 running TrueCopy Synchronous linked by DWDM
- D. 2 x USP running Hitachi Universal Replicator linked by 2 x OC-3

Correct Answer: BC

---

**QUESTION 2**

A customer creates a database once per day. This database is copied to another storage unit using TrueCopy. When the database is 3 months old it is migrated to external storage using Volume Migrator during a short window. Which two are relevant? (Choose two.)

- A. TrueCopy must not be active on the LUN.
- B. The database should be in Read Only mode.
- C. A ShadowImage copy of the database is migrated.
- D. The external LUN must be on the same type of RAID.

Correct Answer: AB

---

**QUESTION 3**

An Hitachi Data Systems customer is using HiCommand Device Manager (HDvM) to manage TrueCopy pairs. An attempt to create a pair fails and the content of the resulting HDvM error message is not sufficient to diagnose the reason for the failure. After escalating to the support group for further analysis, a request is made by the support group to provide the relevant HDvM logs. Which two utilities must be run to collect the requested HDvM logs? (Choose two.)

- A. the TIA utility
- B. the TIC utility
- C. the jpcras utility
- D. the hcmdsggetlogs utility

Correct Answer: BD

---

**QUESTION 4**

During a Copy-on-Write SnapShot (CoW) implementation, a customer asks you to demonstrate the Quick Restore functionality of the software. CCI for this environment is installed on a UNIX host using korn shell and the CoW CCI device group is COW\_db01. Which statement is correct?

- A. This is not possible using Copy-on-Write SnapShot.
- B. Use the pairresync -g COW\_db01 -fq normal -restore commands.
- C. Use the export HORCC\_REST=NORMAL; pairresync -g COW\_db01 -restore commands.
- D. Use the export HORCC\_REST=COW\_QUICK; pairresync -g COW\_db01 -restore commands.

Correct Answer: A

---

**QUESTION 5**

A customer uses ShadowImage At-Time Split to create a copy of an online Oracle database so that it can be mounted and started on another server for testing purposes. What will the database do on the recovery server when it starts to ensure that the transactions are restored to a point in time?

- A. Roll forward the redo logs.
- B. Perform a database dump.
- C. Transition into hot backup mode.
- D. Create copies of the archive logs.

Correct Answer: A
