QUESTION 1

A VSP receives a pinned track error with a "write error" description on the SVP. How would you resolve the problem?

- A. Replace the SVP.
- B. Replace the PDEV.
- C. Replace the DKA.
- D. Restore the customer data.

Correct Answer: B

QUESTION 2

Which two statements about LU Size Expansion (LUSE) are true for a Hitachi VSP system? (Choose two.)

- A. LUSE volumes can reside on external storage.
- B. You can make a LUSE from LDEVs on different CUs.
- C. You can only make a LUSE when LDEVs are the same size.
- D. You can make a LUSE from LDEVs of different emulation type.

Correct Answer: AB

QUESTION 3

You are installing a VSP with 2 DKCs containing 2.5" and 3.5" form factor HDDs. Which two configuration rules apply? (Choose two.)

- A. 2.5" and 3.5" DKUs can be mixed in any pattern.
- B. Each DKU Rack can only contain one drive form factor.
- C. Each HDU can only contain one drive form factor.
- D. The drive form factor must be unique per DKC.

Correct Answer: AC

QUESTION 4

You want to install Hitachi Dynamic Link Manager (HDLM) on a customer's server but you are not sure if the server HBA types and versions are supported. Which two actions would help you find this information? (Choose two.)

- A. Check the HDLM release notes.
- B. Call the HDS Customer Support Center.
- C. Check the HDLM Concepts and Planning Guide.
- D. Access the HiFire Web site to verify the configuration.

Correct Answer: AD

QUESTION 5

Which two statements describe the purpose of an action code (ACC) on the VSP? (Choose two.)

- A. It provides a link to the Work ID.
- B. It contains the SIM message.
- C. It contains the part location.
- D. It provides detailed error information.

Correct Answer: AC
