QUESTION 1

You are implementing JetClone into a customer's existing Hitachi NAS platform. Which three elements are required? (Choose three.)

- A. NAS v8 CLI
- B. iSCSI volumes
- C. WFS-2 file system
- D. additional licensing
- E. Hitachi NAS G2 hardware

Correct Answer: ACD

QUESTION 2

A customer has two independent Hitachi NAS Platform 3080 nodes. They want to implement a Hitachi NAS Platform 2-node cluster. Which two are required for implementing this solution? (Choose two.)

- A. Use an external SMU.
- B. Ensure that all system drives are accessible by both nodes.
- C. Connect a 10 GbE network switch for Cluster interconnect.
- D. Assign dedicated storage system for each node.

Correct Answer: AB

QUESTION 3

The administrator of a production Hitachi NAS Platform connected to a Hitachi AMS2300 requires file level replication to another Hitachi NAS Platform. However, there is a concern over the large numbers of files and about the high change rate as the replication time window is small. What should be done to reduce the replication time?

- A. Use Transfer Primary Access.
- B. Use the changed directory list option.
- C. Migrate the admin EVS to the node replicating the data.
- D. Create an additional IP address on the source EVS.

Correct Answer: B

QUESTION 4

A customer has asked you to plan a server consolidation of their Windows server environment consisting of 44 Windows 2003 servers. 6,500 users use these servers to store data files in departmental shares as well as home directories. The customer has requested that you identify points of contention with your consolidation strategy and solution design. Which three potential points of contention must you address? (Choose three.)

- A. the number of concurrent users per server being consolidated
- B. the make and model of the servers being consolidated
- C. the load balance of EVSs per node
- D. the hot fix versions running on the Windows 2003 servers
- E. the peak workload of each server being consolidated

Correct Answer: ACE

QUESTION 5

The administrator of a Hitachi NAS Platform connected to a Hitachi VSP requires a 256 TB file system for a new application. What must be considered to satisfy this requirement?

- A. storage pool chunk size
- B. file system block size
- C. file system security model
- D. fibre channel switch port speed

Correct Answer: A
