QUESTION 1

An advertising agency stores multiple digital images, video, audio, file shares, and database data that originate from 10 source servers. Backups of the data are written to an HP StoreOnce backup device. The agency is experiencing poor deduplication performance in their backup environment.

What should the agency do to optimize deduplication performance of their backup solution?

- A. Enable software compression and synthetic full backups.
- B. Group libraries/shares with similar data types together for the source servers.
- C. Split virtual libraries across multiple Fibre Channel ports on the network.
- D. Setup a separate library/share for the source servers.

Correct Answer: B

QUESTION 2

A customer has an HP Enterprise Backup Solution with multiple fileserver hosts and an HP EVA 8000 storage system. The customer wants to use the backup software to decrease restore times. What should the customer implement?

- A. 10Gb Ethernet
- B. Staging disk storage
- C. Multipath IO
- D. Fibre Channel

Correct Answer: B

QUESTION 3

How do copy-on-first-write snapshots affect space consumption?

- A. The base volume is physically copied
- B. Snapshots are fully provisioned
- C. Snapshots without changes do not consume space
- D. Data is written twice after the snapshot

Correct Answer: C

QUESTION 4

A customer uses an HP Enterprise Backup Solution with the following network environment:

- Multiple storage systems
- Several server hosts
- Shared tape library

The server hosts run three operating systems:

- Windows Server 2008 R2
- Windows Server 2012
- Red Hat Enterprise Linux

In which directions does data flow between devices during a backup job? (Select two.)

- A.
from each storage system to the tape library
- B.
from the host to a replication site
- C.
from each the host to the tape library
- D.
from the host to each storage system
- E.
from each storage system to each host
- F.
from each storage system to a replication site

Correct Answer: CE

QUESTION 5

Government regulations require an HP client company to retain provably unmodified data. The company needs a solution that enables them to store write once, read many (WORM) files alongside read/write data and to retrieve the files quickly. They also need to use remote replication for the WORM files.

Which HP product provides this capability?

- A. HP StoreAll Storage
- B. HP 3PAR StoreServ 7000 Peer Motion
- C. HP StoreVirtual Remote Copy
- D. HP StoreOnce Catalyst

Correct Answer: A

<http://h20195.www2.hp.com/V2/GetPDF.aspx%2F4AA2-9975ENW.pdf>

Data retention via WORM file immutability and policies, data mobility via tiering and continuous remote replication.
