⚙ **800,000+** Satisfied Customers

QUESTION 1

Which condition result in an Persistent Port failover on an HP 3PAR StoreServ array at In Farm OS level 3.1.3? (Select two)

A. Automatic master node assignment change

B. RSCN event after zone set update

C. Loss of port sync

D. User directed Host Persona Change

E. Node Reboot or spontaneous failure

Correct Answer: BD

Fabric zoning controls which FC end-devices have access to each other on the fabric. Zoning also isolates the host and HP 3PAR StoreServ Storage ports from Registered State Change Notifications (RSCNs) that are irrelevant to these ports

When changing an existing host persona from 6 to 11, a host reboot is required tor the change to take effect. This is an offline process. See "Configuring ESX/ESXi Multipathing for Round Robin via SATP PSP" (page 42) for the detailed procedure, as the host persona change should coincide with changing the SATP rules on the host as well.

QUESTION 2

Which device type for server-side deduplication does HP Data Protector use?

A. OST

B. Implicit

C. Catalyst

D. Explicit gateway

Correct Answer: D

QUESTION 3

A solution architect from an HP authorized reseller calls you with a need to configure HP BladeSystem and an HP StoreServ 7400 Storage System. He needs a bill of materials and a budgetary quote (List Price) for his colleague. Which tool do you recommend he use?

A. HP Storage Sizing Tool

B. HP Single Point of Connectivity (SPOCK)

C. HP Salesbuilder for Windows

D. HP Storage Product Selector

Correct Answer: C

http://www.tools.hp.com http://sbw.cup.hp.com

Features SBQWB - Configuration and quotation module Knowledge Base Files - Configuration database rules Price book files - The HP list price and contractual files Discount files - Channel partner-specific discount information SalesBuilder for Windows has two main components: the Configurator and the Quoter.

QUESTION 4

Scenario Following the merger of two financial companies, management is considering combining the two distinct customer call centers into a single physical location. In addition to the overall call center headcount increasing by 30%, the support for two distinct customer bases presents the potential of having two different desktop PCs on the desk of each call center employee. Instead of correspondingly increasing IT support headcount to manage the single, larger call center and call center infrastructure, management believes they can reduce the required time to support call center operations by 40% if they employ virtual desktop technology.

An initial assessment has identified the need for a centralized storage solution that could support 500 virtual desktops running a variety of applications that can scale quickly to accommodate an expected increase in call center staff. The customer is already an HP Blade System customer using HP Virtual Connect Flex-10.

Some of the additional business criteria identified in customer planning interviews includes:

Use client virtualization for the desktops.

Achieve the highest possible density and performance for the virtual desktops,but keep the virtual desktop storage traffic off the network due to a current, existing limitation of only 1GbE.

Do not use standalone, network-attached storage.

Limit the impact of additional rack space.

Minimize the risk of additional help-desk tickets.

Present multiple solutions, prioritized with a recommendation.

Refer to the scenario.

The customer is concerned about data migration from their third-party storage array to a new solution. How do you solve this concern.

A. Focus on an HP StoreServ 7000 Storage solution to use the online import from data migration.

B. Advise a new backup and recovery concept using HP StoreOnce Backup Systems to avoid data loss.

C. Present Hyper Visor storage migration functionalities to migrate data online.

D. Include HP Virtual Connect FlexFabric modules in the design to keep all migration paths open.

Correct Answer: C

Present HyperVisor storage migration functionalities to migrate data online

QUESTION 5

A customer wants to replicate the same data on their HP 3PAR StoreServ storage arrays to two separate campus locations. Which Remote Copy topology would allow the customer to achieve this activity?

A. 2:1 Asynchronous Remote Copy

B. Synchronous Continuous Access

C. Synchronous Long Distance

D. Asynchronous Long Distance

Correct Answer: C

HP 3PAR Remote Copy.pdf, page 10 - Synchronous long-distance topology
