QUESTION 1

What are special installation considerations when setting up SiteScope as a Failover/High Availability (HA) environment? (Select three.)

- A. Primary SiteScope must be installed on a shared resource that can be accessed by the Failover Manager machine.
- B. SiteScope can be set up as a Failover/HA environment only on a Windows platform.
- C. Primary SiteScope and SiteScope Failover must be installed on the same platform type.
- D. In order to host both the Failover Manager and the Failover instance of SiteScope, the Failover server should have significantly more resources than the Primary SiteScope host.
- E. SiteScope can be set up as a Failover/HA environment only on a UNIX platform.
- F. During SiteScope installation, the Failover Manager Service must be configured to run as a user that has network access to the shared drive that hosts the SiteScope configuration.

Correct Answer: ACF

QUESTION 2

How can a SiteScope administrator check the expiration date of the certificates imported into SiteScope?

- A. using the HP certificate checker
