A network administrator is upgrading the operating system on an HP Comware switch. When copying the new image from a TFTP server to flash of the switch, the process fails because there is not enough flash to store the new operating system. The new operating system is 3.2MB in size. The network administrator then executes the commands shown in the exhibit.

Which action should the network administrator perform to solve this problem?

- A. Reformat flash and execute the TFTP upgrade command.
- B. Execute the clear Flash command and perform the TFTP upgrade again.
- C. Execute the reset recycle-bin command and perform the TFTP upgrade again.
- D. Execute the delete old.app command and execute the TFTP upgrade command.

Correct Answer: C

When you delete a file with HP switches, it moves the file to the recycle bin and the file still occupies storage space. To

permanently delete the file from the recycle bin, execute the reset recycle-bin command in the original directory of the file.

QUESTION 2

What is the default payload size for an 802.3 Ethernet frame on HP switches?

- A. 1500 bytes
- B. 1518 bytes
- C. 1522 bytes
- D. 9022 bytes

Correct Answer: A

QUESTION 3

Which statement is true about BPDU-Protection on HP Comware switches?

- A. BPDU-Protection is enabled on the root switches globally and will detect rogue switches on downlink ports.
- B. BPDU-Protection is enabled on the root switches, downlink ports and will detect rogue switches on those ports.
- C. BPDU-Protection is enabled globally and will detect rogue switches on edge ports.
- D. BPDU-Protection is enabled per port and will detect rogue switches on those ports.

Correct Answer: C

QUESTION 4

Which methods can a network administrator use to upgrade the operating system of an HP ProVision switch? (Select two)

- A. SCP
- B. SFTP
- C. SNMP
- D. USB
- E. FTP

Correct Answer: BD

QUESTION 5

What does an IP host learn from an ARP reply?

- A. An IP address
- B. The local subnet
- C. A MAC address
- D. A Netbios name

Correct Answer: C
