QUESTION 1

Which functionality is offered by the HP StoreOnce 4900 Backup system compared to the HP StoreOnce 6500 Backup system?

- A. CIFS and NFS
- B. Insight Remote Support
- C. iL04
- D. iSCSI and FC interfaces

Correct Answer: A

QUESTION 2

What should you consider when generating a full support ticket on an HP StoreOnce 6500 Backup system?

- A. The support ticket file can be up to 6GB in size.
- B. The support ticket can only be generated using the CLI.
- C. The collection process has to be initiated using the GUI.
- D. The collection process could take as long as 75 minutes.

Correct Answer: C

QUESTION 3

Your customer has data security requirements. Which features provided by the HP StoreOnce Security Package will help the customer meet this requirement? (Select two.)

- A. Secure Erase
- B. in-flight backup encryption
- C. secure host presentation
- D. data-at-rest encryption
- E. Encryption Key Management

Correct Answer: AD

QUESTION 4

The connection to node one and two of a four-node HP StoreOnce 6500 Multi-node Backup system is broken. What

happens during the failover?

- A. Service set one will be automatically moved to node three, and service set two will be automatically moved to node four.
- B. Once the failover is finished, all jobs will automatically be restarted on node three and four.
- C. All jobs will fail since a failover occurs only between nodes within the same couplet.
- D. After restarting node one and two, the fallback service will automatically move the service sets back.

Correct Answer: D

QUESTION 5

You have just implemented an HP StoreOnce 6500 Backup system for your customer and are performing test backups to prove the installation. What happens to a running backup job in the event of a Service Set failover?

- A. Jobs on the failed node will be aborted.
- B. Jobs on the failed node will be automatically restarted on the other node.
- C. Jobs on the failed node will be paused.
- D. Jobs on both nodes will be aborted.

Correct Answer: B
