QUESTION 1

Which statement best describes the licensing model used in HP ALM security solutions?

A. HP Software Security Center solutions use a "High-water mark of past use" license model where usage fees are calculated based on the maximum number of concurrent users in a defined past time period (typically monthly).

B. All HP Software Security Center solutions are server-based and use a concurrent user network licensing model.

C. HP Software Security Center solutions support a variety of flexible licensing options, including single "named" user, node-locked and concurrent "floating" user licenses, which are valid for a fixed period and annually renewable.

D. HP Software Security Center solutions use pay-per-use license fees and are based on actual usage.

Correct Answer: B

QUESTION 2

Which statement about performance validation resonates with the key personas in the application delivery supply chain? (Select three.)

A. It maximizes utilization of resources through pooling and sharing of licenses, hardware, and software.

B. It increases process efficiency and produces better quality applications via Center of Excellence model.

C. It drastically reduces overhead of test maintenance.

D. It accelerates time-to-value for achieving secure applications.

E. It validates modern applications, such as mobile and composite.

F. It maximizes productivity and collaboration in distributed teams through 24x7 web interface.

Correct Answer: BDF
