QUESTION 2

What are the key capabilities of HP Service Virtualization that help developers, functional testers and performance testers to overcome their service access issues? (Select three.)

- A. automatically updating vulnerability patch content
- B. locally simulating third-party services
- C. replicating configurations across geographies and same data centers
- D. removing dependencies on services
- E. providing Service Intelligence
- F. verifying performance and resilience for the cloud by modifying service behavior

Correct Answer: CDF

QUESTION 3

Which statement is most accurate with respect to Application Security validation AND is most likely a concern of the VP of Applications?

- A. ALM security reduces cost to the business by detecting security threats and blocking unauthorized access to application assets.
- B. A leading cause of IT waste (cost) is poor defect management and rework. The HP approach to ALM security

improves this by accurately identifying security defects earlier in the application lifecycle where risk can be more efficiently mitigated.

C. A leading cause of IT waste (cost) is poor defect management and rework. The HP approach to ALM security improves this by accurately identifying security defects after an application is in production and by providing actionable information to developers for future updates.

D. The goal of ALM security is to reduce service outages and reduce overall operational costs to the business. ALM security improves the stability and performance of the applications by providing real-time metrics for better business decision making.

Correct Answer: D

QUESTION 4

What are the differentiators for HP Unified Functional Test? (Select three.)

- A. end-to-end process validation for multi-layer applications with HP Unified Functional Testing
- B. unique data-orientated simulation
- C. test planning, scheduling, execution, and reporting across concurrent projects and multiple people
- D. advanced data awareness and management with HP Quality Center
- E. performance modeling and scalability
- F. comprehensive Web 2.0 support with the ability to extend to additional toolkits

Correct Answer: ABC

QUESTION 5

What are the motivations and concerns of the VP of Applications with respect to security validation within the application lifecycle?

- A. Solutions that add value without costing more time and resources are beneficial to my organization and can help me achieve my long-term goals. One of my chief concerns is to align IT with the business strategy of the organization.
- B. Solutions that add value without costing more time and resources are beneficial to my organization and can help me achieve my long-term goals. One of my chief concerns with respect to ALM security is to improve operational responsiveness.
- C. One of my chief concerns is to implement IT processes and procedures to align with infrastructure demands.
- D. Solutions that add value without costing more time and resources are beneficial to my organization and can help me achieve my long-term goals. One of my chief concerns with respect to ALM security is to improve the quality of delivery.

Correct Answer: B
