100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by HP Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

What are the advantages of a merge join versus a hash join? (Select two.)

- A. Sometimes a merge join runs faster than a hash join.
- B. A merge join uses memory more efficiently.
- C. A merge join requires no optimization.
- D. A merge join can spill to disk if the inner table is too large.
- E. A merge join joins the data into a new projection.

Correct Answer: BC

---

**QUESTION 2**

Which statement is true about a query explain plan?

- A. It determines how to run the query, runs it, and returns the result.
- B. It writes the SQL to execute a query.
- C. It tells exactly how many rows will be returned by the query.
- D. It displays the results of Optimizer to the user, showing projection(s) used and the query process.

Correct Answer: B

---

**QUESTION 3**

What distinguishes table partitioning from projection segmentation?

- A. If table data is partitioned, associated projections can only be replicated.
- B. If table data is partitioned, the table cannot participate in a prejoin projection.
- C. If table data is partitioned, associated projections cannot be segmented.
- D. If table data is partitioned, associated projections can also be segmented.

Correct Answer: D

---

**QUESTION 4**

What are the advantages of a group by pipe versus a group by hash? (Select two.)

- A. A group by pipe uses memory more efficiently.
- B. A group by pipe can be processed spill to disk if the join result is large.
- C. A group by pipe is at least as fast as a group by hash.
- D. A group by pipe requires no optimization.
- E. A group by pipe builds its entire output table in memory.

Correct Answer: AE

---

## QUESTION 5

What are the actions of the mergeout task? (Select three.)

- A. Mergeout rewrites all ROS containers.
- B. Mergeout writes data to memory.
- C. Mergeout consolidates containers on disk.
- D. Mergeout places data into all defined projections on the source table.
- E. Mergeout purges deleted data already on disk.
- F. Mergeout moves data from memory to disk.

Correct Answer: CDE
