QUESTION 1

What is the primary capability of the HP Server Automation Ultimate Edition solution that differentiates HP from its competitors?

- A. Server Automation Ultimate Edition is highly scalable, managing 100,000+ servers.
- B. Server Automation Ultimate Edition provides regulatory compliance for globally distributed data centers.
- C. Server Automation Ultimate Edition enables the distribution of Microsoft security updates.
- D. Server Automation Ultimate Edition automates server lifecycle management.

Correct Answer: B

QUESTION 2

Which HP Database and Middleware Automation value best resonates with the persona involved in Task Automation?

- A. security of virtual farms hosting clustered database systems
- B. end-to-end transaction and service level management through proactive end-user monitoring
- C. delivery of industry-standard best practices and subject matter expertise
- D. time value of data capture, coupled with immediate rich analytics insight

Correct Answer: A

QUESTION 3

Which specific challenges are faced by operations personnel and solved by the HP Server Automation Premium Edition solution? (Select two.)

- A. The patching of the Oracle database estate is resource-intensive.
- B. Fulfilling PCI compliance requirements in a timely manner is impossible.
- C. There is no tracking of storage utilization at array, switch, volume, and application level.
- D. Mean time to repair (MTTR) of network devices is too long, resulting in failed SLAs.
- E. Change execution is slow and error-prone.

Correct Answer: AB

QUESTION 4

What is the correct value proposition for the HP Software Database and Middleware Automation solution?

- A. monitors administrative tasks such as provisioning, compliance, patching, and release management associated with databases and application servers
- B. reduces downtime and mean time to repair (MTTR) through root-cause analysis that maintains accuracy for databases and application servers
- C. prevents unauthorized security breaches of environments hosting back-end databases
- D. delivers industry-standard best practices to address challenges around compliance, middleware, and database patching, and code release

Correct Answer: A

QUESTION 5

Which discovery question allows you to identify a customer's critical business issue in terms of costs associated with Task Automation?

- A. Are you spending more time gathering and formatting data and less time on results analysis?
- B. What challenges are you facing in terms of staying ahead of the competition by delivering more innovative services?
- C. Are you looking to adapt to new initiatives, such as cloud computing?
- D. Are you aware of your server-to-administrator and/or database-to-administrator ratios?

Correct Answer: A
