QUESTION 1

A customer has an HPE 3PAR StoreServ with FC and SSD drives who would like to improve the performance for random reads. Which HPE 3PAR StoreServ feature would provide better read performance?

A. Adaptive Flash Cache

B. Deduplication

C. Express Layout

D. SmartCache

Correct Answer: A

QUESTION 2

How does the HPE StoreVirtual VSA storage platform scale performance and capacity?

A. eliminates the need for storage controllers

B. enables access through multiple protocols

C. aggregates all resources into a single storage pool

D. recreates storage pools on multiple devices

Correct Answer: D

QUESTION 3

A customer wants to expand his cascaded B-series based SAN but is concerned about latencies within the SAN backend. You recommend changing the topology to a full mesh.
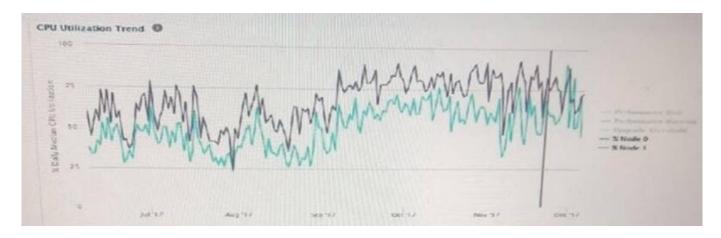

Which switch feature will ensure that the latencies in the backend are at the lowest possible level?

A. LACP

B. NPIV

C. FSPF

D. VSF

Correct Answer: C

QUESTION 4

Refer to the exhibit.

A customer has upgraded the first of their two HPE StoreServ 8200S to the latest InForm OS version to take advantage of the compression feature. You have been asked to design the storage configuration to support Oracle Database volumes to utilize HPE 3PAR compression.

Based on the analysis of the array, what would be your suggestion to implement the requested change?

A. Consider adding another node pair for compression to work efficiently.

B. Install the Catalyst agent on the Oracle server to enable inline compression on the selected VV.

C. Configure the source-side compression to offload compression to the host.

D. Balance the workloads between the arrays to have enough headroom for compression.

Correct Answer: C

QUESTION 5

Which storage principle would benefit a customer who has several departments in their organization with different storage needs?

A. autonomic management

B. multi-tenancy

C. federated storage

D. scale out storage

Correct Answer: B
