## QUESTION 1

A customer asks for an integrated solution for their remote office with All-Flesh storage and ease of management. Application-aware replication to their main office is an important requirement.

Which HPE solution component should you discuss with the customer first?

- A. HPE SimpliVity 380
- B. HPE MSA 2052 Storage
- C. HPE Nimble CS1000 system
- D. HPE 3PAR StoreServ 8200

Correct Answer: A

---

## QUESTION 2

A customer needs to be able to manually map out preferred paths within a multi-switch fabric, based on application, priority, and topology, while allowing failover to a non-preferred path if the preferred path fails. Which B-series FC switch functionality should be used to provide this?

- A. enhanced group management
- B. traffic isolation zones
- C. quality of service
- D. frame filtering

Correct Answer: B

## QUESTION 3

Which statement describes HPE StoreVirtual Network RAID functionality?

- A. Redundancy is managed on a per-volume basis.
- B. With Network RAID 10+2 data is striped and mirrored across two or more storage systems.
- C. Network RAID 10 requires an even number of storage nodes.
- D. Volumes remain available if an odd number of nodes are available.

Correct Answer: D

---

## QUESTION 4

You are presenting an HPE Nimble solution based on HF series hardware to a customer. Which support advantages will be provided with this solution? (Choose two.)

- A. InfoSight handles the work of 1st and 2nd level support specialists.
- B. InfoSight performs firmware and software updates without additional administrative support.
- C. Customers always interact with a 3rd level support engineer, when needed.
- D. Customers only have to deploy a service processor for automating support tasks.
- E. InfoSight offers predictive analytics and integration into HPE Support Center using Insight Online.

Correct Answer: CE

---

## QUESTION 5

A customer needs to implement a new SAN fabric for their growing environment. The new SAN should provide a high performance and port-efficient network with many-to-many connectivity. Because of changing requirements and the possible acquisition of another company in the near future, the customer cannot predict the I/O traffic pattern within the SAN. The customer is also concerned about availability.

Which type of SAN topology should you recommend?

- A. cascaded fabric
- B. meshed fabric
- C. core-edge fabric
- D. single-switch fabric

Correct Answer: B
