QUESTION 1

Which tool can be used to check compliance with best practices for HPE StoreVirtual deployments?

A. HPE OneView

B. HPE Storage Management Utility

C. HPE Centralized Management Console

D. HPE SPOCK

Correct Answer: C

QUESTION 2

A Customer has two sites that are 100 miles (160 km) apart. Each site is 100 percent virtualized and has identical storage and server infrastructure, running active/active environment with array based replication. The customer needs a solution that enables them to recover either site with minimal input from their IT trams, while meeting their two hour RTO and 15 minutes RPO SLAs.

What should you recommend to improve this customer\'s current infrastructure?

A. VMware Site Recovery Manager

B. VMware vCenter Operations Manager

C. HPE 3PAR Remote Copy Software

D. VMware vRealize automation

Correct Answer: A

QUESTION 3

A customer with a LAN/SAN environment is considering HPE 3PAR for an upcoming storage refresh, but has a tight budget The customer needs 200 TB of Fibre Channel- attached, very low latency, block-storage for application servers, and 10 TB of LAN- attached storage for end-user file/file shares for about 100 end-users. They want to use as much of their existing systems as possible and would like to continue using the ISV backup system installed last year to back up the block-based and file/file share data and files, respectively.

The customer sees a presentation that includes details on the HPE 3PAR File Persona features and they like the idea of consolidating their Fibre Channel and LAN-based storage onto one storage platform. You deliver technical presentations on the HPE StoreOnce and StoreEver backup offerings. The customer asks for an HPE 3PAR solution proposal that includes provisions for backup-to-local disk and tape of all SAN-attached data, and minimal backup-to-disk for all LAN-attached data.

Your sales team is proposing a combined HPE 3PAR StorServ 8000. HPE StoreOnce Backup System, and HPE StoreEver solution and is working on the HPE 3PAR configuration You are developing the proposals for the HPE StoreOnce and HPE StoreEver configurations. While analyzing ways to reduce costs, you determine that the customer\'s backup windows are achievable with either their Fibre Channel SAN or Ethernet environment.

Which additional information should you obtain to enable you to recommend the most cost- effective solution?

A. What is the skill level of the backup administrators?

B. How much power and floor/rack space will the new proposed solution require?

C. Does the customer\\'s ISV Backup System support iSCSJ?

D. Does the customer\\'s ISV Backup System support NDMP?

Correct Answer: D

QUESTION 4

What is a disadvantage of Breakaway Mirror Clones?

A. Data is at risk during the break.

B. Deleted files are not tracked.

C. Multiple sets of data exist.

D. They increase the I/O load to resynchronize.

Correct Answer: D

QUESTION 5

Which statement is correct about virtualized snapshot services on an HPE MSA 1040?

A. The appropriate license must be purchased

B. Some operating systems support snapshots.

C. The HPE MSA 1040 does not support virtualized snapshots.

D. No special license is needed as virtualized snapshots are supported by default

Correct Answer: A
